Wireless Telecommunications Facility

Dear Jeff York,

I, Chad Tuttle, P.E., a registered professional engineer in the state of Connecticut with Registration No. 23924, have examined site photographs provided by the client, dated December 2022 and January 2023, for the Wireless Telecommunications Facility referenced above. Based on the photographs provided; As Built drawings certified by Andre Charles of Link Wireless, dated January 24, 2023; and the construction drawings by B+T Group dated June 21, 2022; I hereby certify that to the best of my knowledge, information, and belief all constructed improvements are in substantial compliance with the permitted construction drawings approved by the Connecticut Siting Council (last revised June 21, 2022) and that said improvements meet the intent of the applicable Codes listed on said drawings (e.g., 2018 CT SBC and NEC 2017). Furthermore, it is hereby noted that, at the direction of the Owner, the Contractor deviated from the approved construction drawings by installing (3) Ericsson Air 6449 B41 Antennas on the Monopole. The Contractor also installed a Pull Box on an Ice Bridge Post within the lease area.

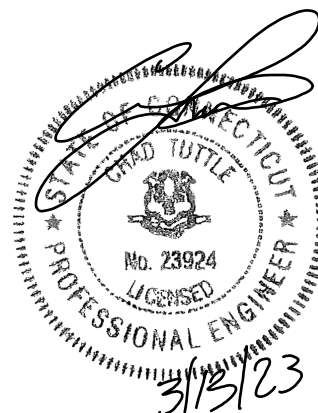

In my professional opinion, any minor deviations from the drawings and specifications will not prevent the project from functioning in compliance with the requirements of the Connecticut Siting Council and other applicable regulatory agencies listed in the drawings.

Should you have any questions or require any additional information, please do not hesitate to contact our office. Thank you.

Engineer's Certification of Completion prepared by: Bthree Barrett

Respectfully submitted by: MTS Engineering P.L.L.C.

Chad Tuttle, P.E.
