Final Report of Special Inspections

Project: CT11696E

Location: 191 MIDDLE HADDAM ROAD, PORTLAND, CT 064

Owner: American Tower Corporation

Engineer of Record: Daniel P. Hamm, P.E.

Tower Engineering Professionals, LLC (TEP OPCO, LLC)

To the best of my information, knowledge and belief, the Special Inspections required by Chapter 17 for the project have been performed and all discovered discrepancies have been reported and resolved.

Representatives of TEP performed the Final Inspections after the construction of the telecommunications facility at the above-referenced address. The Final Inspection was performed on November 8, 2022.

Based on my knowledge, information and belief the wireless installation substantially conforms to the approved plans, 2018 IBC, 2018 CT State Building Code Amendments, Structural Standards for Antenna Supporting Structures and Antennas (ANSI/TIA-222-H), and the following:

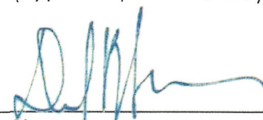

1. Final Construction Drawings dated 07/13/2022, prepared by Hudson Design Group LLC, entitled "T-Mobile L600 Amendment Plan 67E05F Configuration."
2. Final Mount Analysis dated 05-04-2022, prepared by Telamon Tower Engineering PLLC
3. Final Structural Analysis dated 05-16-2022, prepared by American Tower Corporation.

All deviations from the approved plans do not endanger the intended occupancy of the facility and equipment substitutions are approved as equivalent to the original specifications. This report does not include inspections for the findings of the global stability analysis and modifications to the structure. Those modification inspections, if required, are strictly the responsibility of the tower owner & general contractor performing such design and installation.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Respectfully submitted,
Special Inspector
