Re: **EM-VER-126-221222 and EM-VER-126-231103– Cellco Partnership d/b/a Verizon
Wireless Telecommunications Facility, 162 Birdseye Road, Shelton, Connecticut**

Completion of Construction

Dear Attorney Bachman:

The purpose of this letter is to notify the Siting Council that construction activity associated with both facility modification approvals referenced above has been completed.

Pursuant to the Council's approval of EM-VER-126-211222, attached is a letter from ProTerra Design Group, LLC signed on July 25, 2024, verifying that the facility modifications were completed in accordance with the January 5, 2023, Mount Analysis Report prepared by Colliers Engineering and Design. Photographs of the completed improvements are also attached.

Pursuant to the Council's approval of EM-VER-126-231103, attached is a letter from Chappell Engineering Associates, LLC dated July 9, 2024, confirming that the facility modifications were completed in accordance with the September 27, 2023, Mount Analysis Report prepared by Colliers Engineering and Design. Photographs of the completed improvements are also attached.

If you have any questions or need any additional information regarding this facility, please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

RE:

Engineering Field Inspections and Final Statement of Special Inspections

Verizon Site Name: *Shelton North CT (Location Code: 467929)*

Site Address: *162 Birdseye Road, Shelton, CT 06484*

CEA Job Number: *22135.072*

To whom it may concern:

I, Clement J. Salek (State of Connecticut Licensed Professional Engineer No. 26876) of Chappell Engineering Associates, LLC (CEA), have been contracted by Verizon Wireless (VZW) to perform a final site inspection of the recently installed wireless telecommunications installation located at the above referenced location.

Scope of Work:

The recently completed work consists of the installation of (4) Kaelus Interference Mitigation Filters on the rear of the existing antenna mounting pipes. (2) Filters were installed at each of the Alpha and Gamma sectors. Each filter was grounded to the existing sector ground bars and connected to the existing antennas with ½" jumpers.

Engineering Field Inspections:

Based on the findings of the site inspections of the recently installed VZW wireless telecommunications installation described above, CEA has verified that the site is in satisfactory conformance with the engineering construction and structural documents, and conditions of the CSC approval for project number **EV-VER-126-231103**.

- Construction Drawings by Chappell Engineering Associates, Rev 2, dated 10/31/23
- Structural Analysis by SBA dated 10/18/2023
- Antenna Mount Analysis by Colliers Engineering and Design dated 09/27/2023

The field work described under this project has been reviewed, to the Engineer's best knowledge, information, and belief, to be completed in general compliance with the documents listed above. The requested Final Report of Special Inspections has been provided (attached to this letter).

If there are any questions regarding this matter, please do not hesitate to call us.

Very truly yours,

Clement J. Salek, P.E.
