Good afternoon,

The AT&T modifications on the existing telecommunications facilities at the subject site are complete and we are looking to close the CSC Permit. Attached are site photos and the FSSI.

Should you require any additional information, please let us know.

Thank you.

Karin

Final Report of Special Inspections

Project: CT1030 (FA: 10035264)

Location: 435 Mill Street, Southington, CT 06489

Owner: AT&T Mobility

Engineer of Record: Daniel P. Hamm, P.E.

Tower Engineering Professionals, LLC (TEP OPCO, LLC)

To the best of my information, knowledge and belief, the Special Inspections required by Chapter 17 for the project have been performed and all discovered discrepancies have been reported and resolved.

Representatives of TEP Northeast performed the Final Inspections after the construction of the telecommunications facility at the above-referenced address. The Final Inspection was performed on September 6, 2023.

Based on my knowledge, information and belief the wireless installation substantially conforms to the approved plans, IBC 2015 with 2018 CT State Building Code Amendments, Structural Standards for Antenna Supporting Structures and Antennas (ANSI/TIA-222-H), and the following:

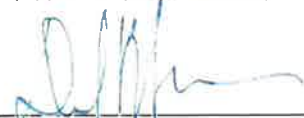

1. Final Rev. 2 Construction Drawings dated 06/01/2022, prepared by Hudson Design Group LLC, entitled "5G NR 1SR CBAND UPGRADE."
2. Final Mount Structural Analysis dated 01/24/2022, prepared by Hudson Design Group LLC
3. Final Tower Structural Analysis dated 01/28/2022, prepared by Hudson Design Group LLC.

All deviations from the approved plans do not endanger the intended occupancy of the facility and equipment substitutions are approved as equivalent to the original specifications.

Interim reports submitted prior to this final report form a basis for and are to be considered an integral part of this final report.

Respectfully submitted,
Special Inspector

Daniel P. Hamm, P.E.
