New Britain, CT 06051

Re: **TS-VER-135-150112 – Cellco Partnership d/b/a Verizon Wireless
366 Old Long Ridge Road, Stamford, Connecticut**

Dear Ms. Bachman:

On May 18, 2015, the Siting Council acknowledged receipt of Cellco's request for an order to approve the shared use at an existing telecommunications facility at 366 Old Long Ridge Road in Stamford, Connecticut. The modifications involved the installation of antennas and associated equipment.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that it had complied with the recommendations made in the structural report attached to that filing. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the installation was completed according to that structural report.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

**Project: Verizon Stamford NW
366 Old Long Ridge Road, Stamford, CT**

AECOM Project No.: 60404060 (VZ5-193)

CSC Reference No.: TS-VER-135-150112

Dear Mr. Parks:

AECOM, contracting as URS Corporation AES, is pleased to provide this "Tower Modification Certification" with regard to the structural components at the above referenced project.

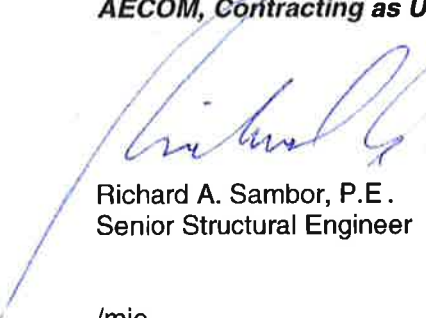

The following are the basis for substantiating compliance with the tower modification documents prepared by AECOM, contracting as URS Corporation AES:

- Review of the Structural Reinforcement Design by URS Corporation, dated June 13, 2013 and the removal of Nextel's equipment at the 118 foot level of the tower as referenced in the Structural Analysis report prepared by URS Corporation, dated October 31, 2014, prior to the installation of Cellco's equipment.

The modification design demonstrates that the tower will not exceed 100 percent of the post construction structural rating. The work under this contract has been reviewed and found, to the Engineer's best knowledge, information and belief to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement solution.

Sincerely,

AECOM, Contracting as URS Corporation AES

Richard A. Sambor, P.E.
Senior Structural Engineer
