Re: **EM-VER-137-220510 – Cellco Partnership d/b/a Verizon Wireless Telecommunications Facility, 86 Voluntown Road, Stonington, Connecticut**

Completion of Construction

Dear Attorney Bachman:

The purpose of this letter is to notify the Siting Council that construction activity associated with the above-referenced facility modification has been completed.

As required by the Council's approval, attached is a letter from Infinigy dated April 11, 2024, verifying that the facility modifications were completed in accordance with the January 19, 2022, Mount Analysis Report prepared by Maser Consulting. Photographs of the completed improvements are also attached.

If you have any questions or need any additional information regarding this facility, please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

RE: Permit: BC-22-70
Verizon Site Name: Stonington east CT
Verizon Site ID#: 324928
Site Address: 86 Voluntown Road, Stonington, CT 06379
Infinigy Job Number: 6039-Z0001-C

To the building official,

Infinigy has conducted a post construction review of the site referenced above. Infinigy has prepared the drawings for the aforementioned site and as such, we have conducted a final site review for the sole purpose of verifying that the installation was completed in accordance with the site plans.

Based on our review of the signed and sealed construction documents for this site issued by Infinigy (Revision C, 02/01/2022), and the as-built drawings, RFDS, Mount Analysis by Maser Consulting Connecticut (dated 01/19/2022) and post construction photographs provided by the contractor, it is our opinion that the site was built in general conformance with the site plans as prepared by Infinigy.

Additionally, the proposed modifications including the placement of all necessary equipment and shelters within the tower compound are implemented as specified here and in the notice dated May 9, 2022. The modifications are in compliance with the exception criteria in Section 16-50j-72 (b) of the Regulations of Connecticut State Agencies as changes to an existing facility site that would not increase tower height, extend the boundaries of the tower site by any dimension, increase noise levels at the tower site boundary by six decibels or more, and increase the total radio frequencies electromagnetic radiation power density measured at the tower site boundary to or above the standards adopted by the Federal Communications Commission pursuant to Section 704 of the Telecommunications Act of 1996 and by the state Department of Energy and Environmental Protection pursuant to Connecticut General Statutes § 22a-162. This facility has also been carefully modeled to ensure that radio frequency emissions are conservatively below state and federal standards applicable to the frequencies now used on this tower.

If you have questions or comments, please do not hesitate to contact me at (321) 439-6704.

Sincerely,

Emmanuel Poulin, P.E.
Vice President Engineering
