Re: **EM-VER-138-140225 – Cellco Partnership d/b/a Verizon Wireless
627 Honeyspot Road, Stratford, Connecticut**

Dear Ms. Bachman:

On March 17, 2014, the Siting Council acknowledged receipt of Cellco's notice of intent to modify its telecommunications facility at 627 Honeyspot Road in Stratford, Connecticut. The modifications involved the replacement of certain antennas and installation of remote radio heads and fiber optic antenna cables.

As a condition of the acknowledgement, Cellco was required to provide the Council with a letter stating that Cellco's facility modifications complied with the requirements referenced in the January 27, 2014 Structural Analysis Report. Attached is a Professional Engineer's Tower Modification Certification letter verifying that the modifications were completed as required.

If you have any questions please do not hesitate to contact me.

Sincerely,

Kenneth C. Baldwin

Re: Tower Modification Certification

Project: Verizon Stratford
627 Honeyspot Rd, Stratford, CT

Tower Owner: Com-Tronics

Engineer: Michael Lassiter, PE (Vertical Solutions)

Centek Project No.: 15003.045

CSC Exempt Mod Reference No.: EM-VER-138-140225

Dear Mr. Parks,

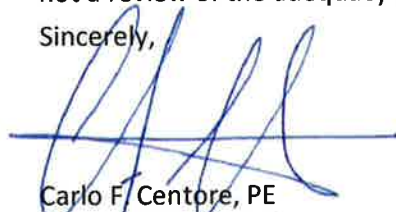

We are providing this "Tower Modification Certification" with regard to the structural components at the above referenced project.

The following are the basis for substantiating compliance with the tower modification documents prepared by Vertical Solutions (VS Project Number: 140008.01 Rev. 0):

- Vertical solution drawings dated 01/27/14 Rev. 0.
- Vertical Solutions Structural Analysis report dated 01/28/14
- Field observations by Centek Engineering personnel on 04/09/2015 and 07/27/15 of the completed modifications which determined all modifications were installed in general compliance with the recommendations of the structural analysis report prepared by Vertical Solutions on 01/28/15

The modification design prepared by Vertical Solutions demonstrates the tower will not exceed 100 percent of the post construction structural rating. The work under this Contract has been reviewed and found, to the Engineer's best knowledge, information and belief, to be completed in general compliance with the documents referenced above. This certification is not a review of the adequacy or effectiveness of the modification/reinforcement.

Sincerely,

Carlo F. Centore, PE
Principal - Structural
