Re: Dominion Energy Nuclear Connecticut, Inc. – Notice of Exempt Modification Millstone Power Station – Completion of Installation of New Diesel Generator for Radio and Telephone Reliability

Dear Ms. Bachman:

On March 5, 2019, Dominion Energy Nuclear Connecticut, Inc. (DENC) submitted a notice of intent (Reference 1), in accordance with R.C.S.A. §16-50j-58 to the Connecticut Siting Council for installation of an exempt modification pursuant to R.C.S.A. §16-50j-57(b)(2). The exempt modification was related to the installation of a diesel generator for radio and telephone reliability. The installed diesel generator is located on a 5-foot wide by 12-foot long by 6-foot 4-inch high concrete equipment pad to the south of the Administration Building.

On April 1, 2019, the Siting Council acknowledged DENC's notice to modify the existing facility and requested to be notified in writing upon completion of the installation of the diesel generator for radio and telephone reliability (Reference 2).

The purpose of this letter is to inform the Siting Council that the installation of the diesel generator for radio and telephone reliability was completed on September 16, 2019. Should you have any questions, please contact Jeffry A. Langan at (860) 444-5544.

Sincerely,

A handwritten signature in black ink, appearing to read "Lori J. Armstrong".

Lori J. Armstrong
Director, Nuclear Station Safety and Licensing
