RE: **SUBPETITION NO. 1133-VER-20241129** - Cellco Partnership d/b/a Verizon Wireless eligible facility request for modifications to an existing telecommunications facility located at 208 Valley Road, New Canaan, Connecticut. **Incomplete Notice.**

Dear Attorney Baldwin:

The Connecticut Siting Council (Council) received the Eligible Facility Request (EFR) sub-petition for the above-referenced facility on November 29, 2024.

Staff has reviewed this EFR for completeness and has identified the following deficiencies in the request:

On September 23, 2022, the Council issued a memorandum to telecommunications industry representatives requiring a cumulative far-field Radio Frequency Power Density Analysis to be provided with all telecommunications modification requests. The radio frequency (RF) emissions report dated February 15, 2023 provided with the request does not include a cumulative far-field analysis. A copy of the memorandum is available on the Council's website at the following link: [20220923-farfieldmemo_final.pdf](http://portal.ct.gov/20220923-farfieldmemo_final.pdf) ([ct.gov](http://portal.ct.gov))

Additionally, the RF emissions report does not include all entities located on or approved to be located on the tower, including AT&T and Dish Wireless.

Therefore, the EFR is incomplete at this time. The Council recommends that Verizon provide a RF Analysis including a rigorous cumulative far-field analysis for all entities located on the tower including Dish and AT&T, that accounts for a 6-foot tall person and the actual antenna pattern for the proposed modifications to the facility with a cumulative %MPE at or below 100%, on or before January 2, 2025. If additional time is needed to provide the requested information, please submit a written request for an extension of time prior to January 2, 2025.

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

Melanie Bachman
Executive Director
