Melanie Bachman, Esq.
Executive Director
Connecticut Siting Council
Ten Franklin Square
New Britain, CT 06051

Re: **SUB-PETITION NO. 1293-BS-01 (Bristol and Southington)** Eversource Energy declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for all transmission facility asset condition maintenance improvements statewide to comply with the updated National Electrical Safety Code clearance requirements.

Dear Attorney Bachman:

On December 1, 2020, Eversource Energy (“Eversource”) received an acknowledgement from the Connecticut Siting Council (“Council”) of Eversource’s notice to replace 13 transmission structures at various locations along the Eversource transmission right-of-way in the Towns of Bristol and Southington subject to conditions. On September 27, 2023, Eversource was granted a third extension from the Council to complete maintenance improvements associated with the structure replacement project by December 1, 2024. Among other conditions of the acknowledgement, the Council required that Eversource submit the following item:

- Not less than 45 days after completion of the transmission line maintenance activity, the Council shall be notified in writing that construction has been completed.

Construction was completed on July 19, 2024.

Additionally, a representative photograph of the completed modification(s) to the existing energy facility, is included as *Attachment A*.

Eversource will be providing one original and two hard copies of this notice in the mail for the Council’s records.

Sincerely,

Deborah Denfeld
Team Lead – Transmission Siting
