Re: **SUB-PETITION NO. 1293-CCMCBP-02 (Columbia, Coventry, Mansfield, Chaplin, Brooklyn, Putnam)** Eversource Energy declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required for all transmission facility asset condition maintenance improvements statewide to comply with the updated National Electrical Safety Code clearance requirements.

Dear Attorney Bachman:

On September 27, 2021, Eversource Energy (“Eversource”) received an acknowledgement from the Connecticut Siting Council (“Council”) of Eversource’s notice to replace 15 transmission structures at various locations along the Eversource transmission right-of-way in the Towns of Columbia, Coventry, Mansfield, Chaplin, Brooklyn, and Putnam subject to conditions. On October 27, 2022, Eversource was granted an extension from the Council to complete maintenance improvements associated with the structure replacement project by September 27, 2023. Among other conditions of the acknowledgement, the Council required that Eversource submit the following item:

- Not less than 45 days after completion of the transmission line maintenance activity, the Council shall be notified in writing that construction has been completed.

Construction was completed on September 21, 2023.

Additionally, a representative photograph of the completed modification(s) to the existing energy facility, is included as *Attachment A*.

Eversource will be providing one original and two hard copies of this notice in the mail for the Council’s records.

Sincerely,

Deborah Denfeld  
Team Lead – Transmission Siting
