**Re: Petition No. 1385 – Power Lines Solar LLC declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the proposed construction, maintenance and operation of a 1.95-megawatt AC solar photovoltaic electric generating facility on approximately 11.16 acres located at 20-1 Short Hills Road, Old Lyme, Connecticut and associated electrical interconnection.**

Dear Ms. Bachman:

I am writing on behalf of my client, Power Lines Solar LLC (“Power Lines”), in connection with Power Lines’s final report to the Council for its approximately 1.95 megawatt (MW) alternating current (AC) solar photovoltaic electric generating facility at 20-1 Short Hills Road, Old Lyme, Connecticut (the “Project”). That report is attached to this letter.

Should you have any questions concerning this submittal, please contact me at your convenience. I certify that copies of this submittal have been made to all parties on the Petition’s Service List as of this date.

Sincerely,

  
Lee D. Hoffman

Petition No. 1385 – Power Lines Solar, LLC Solar Photovoltaic Electric Generating Site

Final Report

---

1. The project was constructed in accordance with, and in line with, the drawings and documents previously submitted to the Siting Council. No significant changes were made to the project's design since the project was approved by the Council, and the project was constructed in accordance with those designs.
2. There were no significant changes during the construction of the project from the approved D&M Plan.
3. There were no significant changes between the drawings submitted and approved by the Council as part of the Petition 1385 filings and the completed as-built site drawings.
4. There are no agreements with abutters or other property owners regarding special maintenance precautions.
5. In order to not burden the Council with a request for a protective order, cost data is not included in this report. If the Siting Council requires such data, the Petitioner will seek to file such information in a separate filing under seal.
6. There are no permanent civil structures present at the solar site. Only posts and racking to support the solar panels, along with inverters, fencing, and pad-mounted interconnection equipment is present at the site.
7. As the Council has been previously informed, all equipment for the project has been installed and is operational as of September 22, 2021.
