Dear Melanie,

I hope you are enjoying the Spring!

I see that Doosan/NuPower has resubmitted their petition as 1406A. Interestingly, the Thermal Loop is no longer part of it.

Given their argument that the fuel cell emissions will be offset by the thermal loop is no longer viable, I'd like to amend my application to be an intervenor to include [CT Gen Stat § 16-258e \(2018\)](#). My understanding is that without the thermal loop, the project will no longer conform with CT's comprehensive energy strategy and may also impact NuPower's power purchase agreement with UI and NuPower's ability to sell renewable energy credits (upon which its financing is largely dependent).

Sincerely,

Joe Provey
