

From Joe Provey

To Melanie Bachman, Walter Bonola, Dan Donovan, Bruce McDermott, CT Siting Council

Dear All,

Here are my responses to interrogatories 2 and 9.

2. Referring to your intervention request form dated March 2, 2021, please submit a map or National Historic Registry documentation that defines the limits of the Seaside Village.

Seaside village is listed in the National Register of Historic Places database

<https://www.nps.gov/subjects/nationalregister/database-research.htm>

Please enter 90001424 to locate.

We have also scanned the Historic Registry documentation held at our office. (See "Historic Registry Docs" below.)

Our Warranty Deed has also been scanned. It provides detailed measurements of the parcels Seaside Village Inc. owns. (See "Warranty docs" below.)

9. Provide a zoning map that shows the limits of the Seaside Village cooperative housing development and abutting districts, including the proposed project site.

Please see the attached map file (Map of Historic Districts).You may also access other interactive maps by going to <https://www.bridgeportct.gov/gis>, including an aerial map that unfortunately is too large to email. I can supply via Dropbox.

Or use this shortcut: <https://www.bridgeportct.gov/gis/mapgallery> . Choose the Neighborhoods Map to see the boundaries of the South End or choose the Historical Districts map to see the Seaside Village Historic District and other historic districts within a short distance to the proposed plant site. There is also a map of Neighborhood Assets that supports our assertion that the proposed plant is too close to cultural assets.
