### STATE OF CONNECTICUT CONNECTICUT SITING COUNCIL

IN RE:

:

A PETITION FOR A DECLARATORY : PETITION NO. 1425

RULING THAT A CERTIFICATE OF

ENVIRONMENTAL COMPATIBILITY AND PUBLIC NEED IS NOT REQUIRED FOR THE

CONSTRUCTION. OPERATION AND :

MAINTENANCE OF A 1.9 MWAC SOLAR :

PHOTOVOLTAIC PROJECT AT 360

GAYLORD MOUNTAIN ROAD IN HAMDEN, :

CONNECTICUT : JANUARY 5, 2021

### SUPPLEMENTAL LATE-FILED EXHIBIT RESPONSE OF GAYLORD MOUNTAIN SOLAR PROJECT 2019 LLC

On December 15, 2020, the Connecticut Siting Council ("Council") asked the Petitioner to submit responses to two questions in a second set of late-filed exhibits ("LFE2"). On December 30, 2020, the Petitioner submitted its responses to LFE2 noting, in response to question (a), that additional information from the Quinnipiack Valley Health District ("QVHD") may be available prior to the continuation of the Petition No. 1425 evidentiary hearing. Below is the Petitioner's supplemental response.

(a) Provide information regarding the typical depths of private drinking water wells located on properties adjacent to the site.

#### Response

Information regarding the depth of residential wells in the area around the Gaylord Solar Facility location was requested from the Quinnipiack Valley Health District pursuant to the State's Freedom of Information Act. Unfortunately, due to restrictions related to the COVID 19 on Health District operations, it is unclear whether the well depth information will be provided

prior to the Council's January 7, 2021 evidentiary hearing. That said, according to the Petitioner's geotechnical engineers, Down to Earth Consulting, LLC, residential drinking water wells in the area near the Gaylord Solar Facility likely will reach depths of more than 100 feet.

#### **Supplemental Response**

The Petitioner was able to obtain Well Drilling Completion Reports (the "Well Reports") from the QVHD for five (5) residential parcels near the project site, including 3, 5, 9 and 18 Hunting Ridge Road and 360 Gaylord Mountain Road (two wells). The Petitioner did not receive the Well Reports for 11 Hunting Ridge Road or 315 Gaylord Mountain Road. Copies of the Well Reports are attached. Consistent with the Petitioners initial response to question (a), the Well Reports confirm that well depths in the area range from 150 to 620 feet below grade.

### **CERTIFICATE OF SERVICE**

I hereby certify that on the 5<sup>th</sup> day of January 2021, a copy of the foregoing was sent, via electronic mail, to:

Jenny Nicolas, Development Project Manager Gaylord Mountain Solar Project 2019, LLC 200 Harborside Drive, Suite 200 Schenectady, NY 12305 jenny.nicolas@dsdrenewables.com
