RE: PETITION NO. 1426 - East Windsor Solar One, LLC petition for a declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the proposed construction, maintenance and operation of a 4.9-megawatt AC solar photovoltaic electric generating facility located west of the Ellington town boundary at 341 East Road, East Windsor, and associated electrical interconnection.

Dear Attorney Hoffman:

The Connecticut Siting Council (Council) received the petition for a declaratory ruling for the above-referenced facility on August 10, 2020.

According to Section 16-50j-39a of the Regulations of Connecticut State Agencies, “no declaratory ruling shall be issued to any person until a complete petition containing all information deemed relevant by the Council has been filed.”

Staff has reviewed this petition for completeness and has identified a deficiency in compliance with Connecticut General Statutes §16-50k(a). Effective July 1, 2017, under Public Act 17-218, Connecticut General Statutes §16-50k(a) requires, “...**for a solar photovoltaic facility with a capacity of 2 or more megawatts**, to be located on prime farmland or forestland,... the Department of Agriculture represents, in writing, to the Council, that such project will not materially affect the status of such land as prime farmland or the Department of Energy and Environmental Protection represents, in writing, to the Council that such project will not materially affect the status of such land as core forest...” The Council’s November 1, 2017 memorandum is attached for your convenience.

There is no letter from the Department of Agriculture submitted as part of the petition for a declaratory ruling that the above-referenced proposed facility will not materially affect the status of prime farmland.

Therefore, the petition is incomplete and not in compliance with the statute at this time. The Council recommends that the petitioner either:

1. Provide written correspondence from the Department of Agriculture that the proposed facility will not materially affect the status of prime farmland on or before September 21, 2020. If additional time is needed to consult with the Department of Agriculture, please submit a written request for an extension of time prior to September 21, 2020; **or**
2. Submit the proposed project as an Application for a Certificate of Environmental Compatibility and Public Need pursuant to the provisions of Connecticut General Statutes §16-50l.

Thank you for your attention to this matter. Should you have any questions, please feel free to contact me at 860-827-2951.

Sincerely,

s/Melanie A. Bachman

Re: Solar Electric Generating Facilities with a generating capacity of 2 or more megawatts

Please be advised that effective July 1, 2017, pursuant to Public Act 17-218, Connecticut General Statutes §16-50k(a) requires:

“...for a solar photovoltaic facility with a capacity of 2 or more megawatts, to be located on prime farmland or forestland, excluding any such facility that was selected by the Department of Energy and Environmental Protection in any solicitation issued prior to July 1, 2017, pursuant to section 16a-3f, 16a-3g or 16a-3j, the Department of Agriculture represents, in writing, to the [Connecticut Siting Council] that such project will not materially affect the status of such land as prime farmland or the Department of Energy and Environmental Protection represents, in writing, to the Council that such project will not materially affect the status of such land as core forest...”

Prior to the submission of any petition for a declaratory ruling for a proposed solar project to the Connecticut Siting Council (Council) that is not exempt as described above, petitioners shall consult with the Department of Agriculture and the Department of Energy and Environmental Protection. Thereafter, the petitioner shall submit to the Council with the petition for a declaratory ruling written correspondence from the Department of Agriculture that such project will not materially affect the status of such land as prime farmland and written correspondence from the Department of Energy and Environmental Protection that such project will not materially affect the status of such land as core forest.

Any petition for a declaratory ruling for a solar facility with a capacity of 2 or more megawatts that is submitted to the Council without the above-referenced written correspondence will be rejected as incomplete. In lieu of submitting a petition for a declaratory ruling, project developers may opt to submit an Application for a Certificate of Environmental Compatibility and Public Need in accordance with the provisions of Connecticut General Statutes §§16-50k and 16-50l, which does not require the submission of written correspondence from the Department of Agriculture or the Department of Energy and Environmental Protection.

Thank you for your anticipated cooperation.
