

Exhibit G

WATER QUALITY CLASSIFICATIONS MILFORD, CT

SURFACE WATER QUALITY CLASSES

NOTES: Water Quality Classifications beginning with S refer to Coastal and Marine Surface Water. Surface Water Quality Classifications beginning with A refer to Aquifer Protection Areas. Class AA, SA, and SB are not shown on this map.

GROUND WATER QUALITY CLASSES

Area of Contribution to Public Supply Well

GA, GAA

GA, GAA may not meet current standards

GB

GC

Final Aquifer Protection Area (Level A)

Major Basin Boundary

EXPLANATION

WATER QUALITY CLASSIFICATIONS (WQC) MAPS are one of the most important tools used by the State of Connecticut. The WQS are a part of Connecticut's clean water program and are essential for protecting and improving water quality. The WQS are based on the Clean Water Act (CWA) and the Safe Drinking Water Act (SDWA). The WQS are used to identify areas where water quality is impaired and to develop strategies to improve water quality. The WQS are also used to monitor water quality and to evaluate the effectiveness of water quality management plans.

GROUND WATER QUALITY CLASSES are used to identify areas where groundwater quality is impaired. The GWC are based on the CWA and the SDWA. The GWC are used to identify areas where groundwater quality is impaired and to develop strategies to improve groundwater quality. The GWC are also used to monitor groundwater quality and to evaluate the effectiveness of groundwater quality management plans.

FINAL AQUIFER PROTECTION AREA (Level A) is a designated area where groundwater quality is impaired. The FAPA is used to identify areas where groundwater quality is impaired and to develop strategies to improve groundwater quality. The FAPA is also used to monitor groundwater quality and to evaluate the effectiveness of groundwater quality management plans.

DATA SOURCES

WATER QUALITY CLASSIFICATIONS DATA - Water quality classifications shown on this map are based on information from the Connecticut Department of Environmental Protection (CTDEP) and the Connecticut Department of Water Resources (CTDWR). The data were collected from 1991 to the present and are based on the most current available data.

GROUND WATER QUALITY CLASSES DATA - Groundwater quality classes shown on this map are based on information from the Connecticut Department of Environmental Protection (CTDEP) and the Connecticut Department of Water Resources (CTDWR). The data were collected from 1991 to the present and are based on the most current available data.

ADOPTED DATES

- Water Quality Standards: February 25, 2011
- Basins: December 1986
- Connecticut River and South Central Coastal Basins: February 1993
- Housatonic River, Housatonic River and Southwest Coastal Basins: March 1999

MAJOR BASINS

1. Pawcatuck
2. Southington
3. Connecticut
4. Housatonic
5. Housatonic
6. Housatonic

MAJOR DRAINAGE BASIN DATA - Major drainage basins shown on this map are from Major Basin Line data developed by the Connecticut Department of Environmental Protection (CTDEP) and the Connecticut Department of Water Resources (CTDWR). The data were collected from 1991 to the present and are based on the most current available data.

BASE MAP DATA - Based on data originally from 1:24,000-scale topographic maps published by the Connecticut Department of Environmental Protection (CTDEP) and the Connecticut Department of Water Resources (CTDWR). The data were collected from 1991 to the present and are based on the most current available data.

BOUNDARY DATA - Boundary data shown on this map are from the Connecticut Department of Environmental Protection (CTDEP) and the Connecticut Department of Water Resources (CTDWR). The data were collected from 1991 to the present and are based on the most current available data.

SCALE 1:24,000 (1 inch = 2000 feet) (WQC maps printed at original size)
