Dear Ms. Bachman:

As requested, please see the following responses.

**What is the total cost of the project:** Total estimated cost is \$150,000.00

**Can you provide a construction schedule with days/hours:**

Proposed construction will take place 9am-5pm, Monday-Friday. Total estimated duration of construction is 30 days.

**What is the estimated run time for the generator and fuel tank capacity:**

The proposed 15kw Polar Power Inc diesel generator has a 92-gal tank. The tank is a double walled steel tank and there is a concrete retention pad as well. The generator has one (1) 12-minute run cycle per week.

**What is the extent of the landscape changes that will take place around the proposed compound in comparison to what is there now:**

The proposed ATT compound is 14 x 21. The proposed area will be excavated of its topsoil and replaced with two concrete pads, a weed barrier/control and ¾" gravel stone. No trees will be removed.

**Why is the proposed backup generator outside of the existing compound:**

The existing compound has no available capacity to add new equipment. Therefore, the generator and new equipment pad is being added.
