Interrogatories

1. Is an emergency backup power source (i.e. battery backup or a generator) proposed for the site? If yes, provide detail, backup power source and anticipated run time under full load conditions based on its battery or fuel tank capacity.
2. If Dish's emergency backup power source is a diesel or propane generator:
 - a. would the backup generator run periodically for maintenance purposes? If so, at what frequency and duration? Would this be scheduled for daytime hours?;
 - b. Would the backup generator have containment measures to protect against fluid leakage?
 - c. What would be the fuel tank capacity and how often would refueling be required?
3. Would a battery backup (if applicable) be used to provide uninterrupted power and prevent a reboot condition? How long could the battery backup alone supply power to the facility?
4. If the duration of a power outage exceeds the battery's capacity, would a temporary generator be brought to the site?
 - a. If yes, what would be the fuel source?
 - b. Provide the location of the generator hookup.
