Re: PETITION NO. 1560 - The Connecticut Light and Power Company d/b/a Eversource Energy (Eversource) petition for a declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the proposed Norwalk Bridge Transmission Relocation Project that consists of the relocation and rebuild of two existing overhead 115-kilovolt (kV) electric transmission lines from railroad catenaries and existing structures within the Connecticut Department of Transportation corridor to an underground configuration within roads and across the Norwalk River for approximately .66 miles between existing Structure No. 522WN north of Monroe Street and Structure No. 536WN north of Van Zant Street in Norwalk, Connecticut, and related electric transmission line improvements.

Notice of Completion of Construction

Dear Attorney Bachman:

At a public meeting held on May 25, 2023, the Connecticut Siting Council ("Council") considered and ruled that the above-referenced project would not have a substantial adverse environmental effect, and pursuant to Connecticut General Statutes § 16-50k, would not require a Certificate of Environmental Compatibility and Public Need, with conditions. The Connecticut Light and Power Company doing business as Eversource Energy, Inc. submits this letter to comply with the Council's condition of approval number nine in the above-referenced petition, as follows:

- Within 45 days after completion of construction, the Council shall be notified in writing that construction has been completed.

Accordingly, this letter is to provide notice that the project construction was completed on September 5, 2025. Representative photographs of the completed modifications to the existing facility are included in Attachment A. If you have any questions, please contact me.

Sincerely,

A handwritten signature in cursive script that reads "Deborah Denfeld".
