Re: Solar Energy Project, East Windsor Solar Two, LLC, 31 Thrall Road, East Windsor, Connecticut

Dear Property Owner:

Please be advised that this office represents Verogy and East Windsor Solar Two, LLC, who are developers of renewable energy facilities. This letter is being sent to inform you that East Windsor Solar Two, LLC intends to develop a 4.0-megawatt ("MW") alternating current ("AC") ground-mounted solar photovoltaic ("PV") system to be located at 31 Thrall Road, East Windsor, Connecticut ("Property").

In connection with this proposed project, East Windsor Solar Two, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after April 14, 2023, seeking the Council's approval of the solar project at the Property. You are receiving this notice from East Windsor Solar Two, LLC because your property abuts the Property.

Once filed, a full copy of the Petition will be placed on file at the Town Hall for the Town of East Windsor, and an electronic copy of the Petition will be provided to the Town. In addition, an electronic copy of the petition will be available on the Siting Council's website at www.ct.gov/csc. Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

Once filed, a full copy of the Petition will be placed on file at the Town Hall for the Town of East Windsor, and an electronic copy of the Petition will be provided to the Town. In addition, an electronic copy of the petition will be available on the Siting Council's website at www.ct.gov/csc. Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

East Windsor Solar Two

Re: East Windsor Solar Two

Current Resident:

I am writing to introduce you to Verogy. We are a West Hartford-based renewable energy developer focused on operating Solar Farms for municipal and commercial clients. Our team has decades of experience in the development, financing, construction, and management of solar energy projects. We are excited to announce that we're currently pursuing a new solar project in East Windsor. In addition to this letter, you will receive an official notice from our attorney that indicates our intent to file an application to the Connecticut Siting Council.

The proposed project, East Windsor Solar Two, is located at 31 Thrall Road. The project's design calls for a 4-megawatt system located on approximately 17.86 of the parcel's 35.68 acres. Once completed, East Windsor Solar Two is projected to generate enough energy to power 890 homes for a year, while generating zero pollution or carbon emissions. Shared Clean Energy Facility (SCEF) projects such as this one result in credits applied to the bills of participating electric customers at no cost to them. Subscribers include low and moderate-income customers, as well as small business & municipal customers. Additionally, East Windsor Solar Two will be an economic contributor to the town, generating new property tax revenues and creating jobs in the region. We are also actively working with the CT Department of Agriculture to receive approval to employ sheep grazing within the fenced limits of this solar array to assist with vegetative maintenance of this facility.

Enclosed is a fact sheet with additional information and we have established a project website (www.verogy.com/east-windsor-solar-two) which will be updated with the latest project information and available as a resource for you throughout this process. We hope you let us know if you have any comments or questions through the Contact Us section at the bottom of the page. We are looking forward to investing in East Windsor and appreciate your feedback as we finalize our proposed project.

The Verogy team looks forward to connecting with neighbors as we work to develop East Windsor Solar Two. If you have any questions, please feel free to reach out.

Sincerely,

Bryan Fitzgerald
Co-Founder, Director of Development

East Windsor Solar Two

PROJECT DESCRIPTION

- East Windsor Solar Two is a solar project located at 31 Thrall Road in East Windsor, Connecticut.
- The 4 MW AC system will generate enough electricity to power 890 average homes for a year.
- The project site is designed to have minimal environmental impacts with no disruption to wetlands or core forest.

BENEFITS TO EAST WINDSOR

- Increased new annual municipal tax revenues with no additional burden on town services.
- Infrastructure upgrades that improve the reliability of East Windsor's electrical grid.
- Reduction in energy demand during peak usage will decrease energy costs for ratepayers statewide.
- Strengthened renewable energy resources that produce electricity locally with zero pollution.

ACHIEVING THE 100% ZERO CARBON TARGET BY 2040 & ENVIRONMENTAL BENEFITS

- As a Class I Renewable Energy Source, East Windsor Solar Two will help support the goals set forth in Governor Lamont's 2019 Executive Order No. 3 100% zero carbon target for the electricity sector by 2040.
- Once operational, the project will offset the equivalent of 4,576 metric tons of CO2 annually, equal to the emissions from 514,957 gallons of gasoline consumed, or to the carbon sequestered by 75,671 tree seedlings grown for 10 years.
- East Windsor Solar Two will be participating in the Shared Clean Energy Facility (SCEF) Program which will result in credits applied to bills of participating electric customers.
- When completed, the project will use an estimated 17.86 acres out of a total 35.68 acres, leaving the balance of the parcel to continue its prior land use characteristics.

APPROVAL PROCESS

This project requires approval from the Connecticut Siting Council, which has jurisdiction over projects like East Windsor Solar Two. It will also work closely with municipal departments in East Windsor throughout the development of the project, and it will obtain a Stormwater General Permit.

FOR MORE INFO ON THIS PROJECT:

SOLAR ENERGY 101

1. Solar panels collect energy from the sun.
2. Inverters convert DC electricity to AC electricity.
3. Electricity is delivered to the circuit that connects to the substation through utility infrastructure.
4. Power is delivered to residential and business consumers through the local grid.

ABOUT VEROGY

Verogy is a West Hartford based solar developer focused on commercial, industrial and small utility scale projects. Built on 75+ years of combined industry experience, the professionals at Verogy have developed, financed and constructed hundreds of solar projects across the United States.
