Re: Petition No. 1575: Salisbury Substation Transformer Replacement Project
Identification of Staging Areas and Erosion and Sedimentation Controls per Condition 2
and Notice of Start of Construction Per Condition 4

Dear Ms. Bachman:

Pursuant to Condition 4 of the Connecticut Siting Council's (Council's) September 1, 2023 Declaratory Ruling approving the Salisbury Substation Transformer Replacement Project (Project), The Connecticut Light and Power Company doing business as Eversource Energy hereby informs the Council that the construction of the Project will commence the week of September 25, 2023.

Pursuant to Condition 2 of the Council's ruling, the proposed staging areas for the Project are illustrated on Attachment A of the Petition. No erosion and sedimentation controls will be necessary for the main staging area, located east of the fenced substation. However, Eversource will install erosion and sedimentation controls along both sides of the portions of the existing substation access road and adjacent to the small staging areas near wetland W1 and stream S1 (refer to Petition pp 6-7, 9, and Attachment A). These erosion and sedimentation controls will be installed as specified in Eversource's April 2022 Best Management Practices Manual.

Sincerely,

A handwritten signature in cursive script that reads "Deborah Denfeld".
