Re: PETITION NO. 1576 - The Connecticut Light and Power Company d/b/a Eversource Energy petition for a declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the proposed Middletown Substation to Oxbow Junction Upgrade Project consisting of the replacement of electric transmission line structures along approximately 5.5 miles of its existing No. 1620 115-kilovolt (kV) electric transmission line right of way between Middletown Substation in Middletown and Oxbow Junction in Haddam, Connecticut, and related electric transmission line and substation improvements - **Notice of Completion of Construction.**

Dear Attorney Bachman:

At a public meeting held on August 31, 2023, the Connecticut Siting Council (Council) considered and ruled that the above-referenced project would not have a substantial adverse environmental effect, and pursuant to Connecticut General Statutes § 16-50k, would not require a Certificate of Environmental Compatibility and Public Need, with conditions. The Connecticut Light and Power Company doing business as Eversource Energy, Inc. submits this letter to comply with the Council's condition of approval number eight in the above-referenced petition, as follows:

- Within 45 days after completion of construction, the Council shall be notified in writing that construction has been completed along with a representative photograph of the project, see Attachment A.

Accordingly, this letter is to provide notice that the project was placed in service on April 1, 2024 and construction is complete. Representative photographs of the completed modifications to the existing facility are included in Attachment A.

Should you have any questions, please do not hesitate to contact the undersigned.

Sincerely,

A handwritten signature in cursive script that reads "Deborah Denfeld".
