Subject: Proposed Battery Energy Storage System  
22 Deerfield Road  
Windsor, Connecticut

Dear Mr. Mehler:

The State Historic Preservation Office (SHPO) has reviewed the referenced project in response to your request for our comments regarding potential effects to historic properties. SHPO understands that the proposed project consists of the construction of a 7-MW/14MWh battery energy storage system (BESS) with associated site improvements. The project will require approval from the Connecticut Siting Council. As a result, it is subject to review by this office pursuant to the Connecticut Environmental Policy Act.

There are no properties listed on the National Register of Historic Places located in the vicinity of the project area. Ten previously recorded archaeological sites have been reported within a mile of the proposed project area. However, readily available historic imagery suggests that much of the project area has undergone significant previous disturbances. Therefore, it is unlikely that intact archaeological deposits will be impacted by the proposed activities. Based on the information submitted to this office, it is the opinion of SHPO that no historic properties will be affected by the proposed BESS development.

SHPO appreciates the opportunity to comment upon this project. Do not hesitate to contact Cory Atkinson, Staff Archaeologist and Environmental Reviewer, for additional information at (860) 500-2458 or [cory.atkinson@ct.gov](mailto:cory.atkinson@ct.gov).

Sincerely,

Jonathan Kinney  
State Historic Preservation Officer
