Key Capture Energy

KCE CT 5 BESS

Willington and Stafford, CT

File name: KCE\_CT5-StaffordTownMeeting2023\_05\_03

**Recorded responses from participants (if applicable)**

Name	Comment	Project response
Glenn	Please confirm the ownership of the properties being the same owner.	The lease property and the easement property under agreement with the project are both owned by Donna Dewolf and family.
Mark	Does the BESS have a fire suppression system?	The Sungrow system typically has a dry sprinkler system. However, this is not always recommended to be used. KCE will provide a full draft ERP which will include guidance on use of such systems and response to fire incident, and seek comment on the plan from the town.
Glenn	If the stream crossing for the access road is in the town of Stafford, does the town Wetland officer need to be involved in permitting?	KCE researched this with assistance from permitting consultant, Flycatcher Environmental: The town does not need to be involved in permitting the stream crossing, This will be under jurisdiction of the CSC.
Glenn	Is the sound study performed at project full size?	Yes, the sound study models the project at max size and max output to ensure project meets sound standards at all operating times.
Sal	Will the project hold a public meeting.	The Project may hold a informal public informational meeting. The project has not made a final determination on this, and is glad to get feedback from the towns. Any decision for an official public hearing would be under the jurisdiction of the CSC.

Participant Name	Title	Email
Mike D'Amato	Willington Zoning Agent	mdamato@willingtonct.org
Randy Heckman	Willington Building Official	rheckman@willingtonct.gov

**Subject matter of meeting:** CSC Pre-application meeting to provide Town officials with summary of any technical reports concerning the public need, the site selection process, and the environmental effects of the proposed facility, as follow up to meeting held 9/12/2022.

**Attach copy of information provided (if applicable)**

KCE\_CT5-Willington TownMeeting2023\_05\_09.ppt

**Recorded responses from participants (if applicable)**

Name	Comment	Project response
M D'Amato	What are the parameters for identifying a location?	Refer to PPT slide 9- <i>Development Cycle</i> , project site identification begins with grid analysis to be certain infrastructure has capacity to accept electricity, KCE performs a regulatory review, the site is reviewed for environmental due diligence, and a project is designed to avoid reduce impact on surrounding areas including existing uses, environmental issues, and effects on abutters and public.
M D'Amato	How does the use of energy benefit greater public?	Refer to PPT slide 3, Benefits of Energy Storage: Enhance reliability, reduce peak demand on system, allows greater penetration of low carbon and renewable energies, reduces need for additional transmission infrastructure.
R Heckman	How does the project impact local fire department?	Refer to PPT slides 18- 23. KCE takes safety and cooperation with local community emergency responders seriously. KCE will provide a draft Emergency Response Plan (ERP) to the local fire department. The ERP will be part of the CT CSC submissions. KCE will invite comment, feedback and opportunities to improve and align the draft plan with local emergency resources. Prior to construction, KCE will work with local responders to finalize the ERP, and will coordinate safety training with local responders. KCE will continue to facilitate ongoing relationships with communications and updated training through life of project.
M D'Amato	Which parties are involved in permitting the stream crossing and which town is that located in?	The permitting of the stream crossing will be within the jurisdiction of the CSC permit application and review process. The published Town of Stafford and Willington boundaries are not fully accurate. KCE has completed a full boundary and ALTA survey for the Willington parcel and is in process of completing Survey for the Stafford Parcel. Completion of these surveys will allow accurate identification of the stream location.

M D'Amato	Did the project consider avoiding the stream crossing by crossing wetland further east?	The original project concept access road traveled through the wetland area. Full field survey and wetland delineation found that the access road would have a lesser square feet of wetland impact (none) by shifting north and using an existing crossing at the stream. The new proposed access road will be located on and improving an existing logging road. There is a damaged culvert where the logging road crosses the stream. KCE will use this crossing location and improve the stream crossing with a replaced culvert meeting current standards. This will result in an overall beneficial impact to the stream and road crossing, compared to negative impacts should the project cross wetland areas.
M D'Amato	What is the likelihood that people from surrounding residences will hear noise from the project?	Refer to sound map and contours on PPT slide 14. Project sound modeling demonstrates that the project will be in compliance with State sound standards at all boundary lines in Willington. Sound science can be complex and we cannot guarantee that an abutting residence will never be able to discern noise emitted from the project. However, based on sound modeling, the sound levels will dissipate to a low level prior to reaching residential buildings making it very unlikely that the BESS noise will be heard or discernable, especially with the existence of ambient noise from other resources (wind, wildlife, traffic, residential and farming activities).
M D'Amato	The access roads should include pullouts as needed to allow vehicles to pass during access.	Good suggestion. KCE has requested that the project engineering team include such pullouts as typically applied to single lane commercial access road operations.
R Heckman	Does the ICC publish BESS codes?	A relevant document about BESS from the ICC can be found here: <a href="https://sustainableenergyaction.org/wp-content/uploads/2022/10/energy_storage_systems_1st_ptg-1.pdf">https://sustainableenergyaction.org/wp-content/uploads/2022/10/energy_storage_systems_1st_ptg-1.pdf</a>

<p>M D'Amato</p>	<p>Does the project plan to provide any further informational presentations? Recommendation: present to the Planning and Zoning Commission prior to submission of the application to CSC. Meetings are held 1<sup>st</sup> and 3<sup>rd</sup> Tuesdays of each month.</p>	<p>KCE appreciates the recommendation and will coordinate with M D'Amato to schedule a project informational presentation to the Planning and Zoning Commission prior to submission of the application to CSC.</p>
<p>M D'Amato</p>	<p>Project should be aware that if the project seeks any type of tax agreement with the town, the town will need to pass a new ordinance. Project should prepare for the timing required to do so.</p>	<p>KCE appreciates the additional information. Project will likely engage in any tax related discussions with the town in Q4 2023.</p>
<p>M D'Amato</p>	<p>Request a digital copy of these notes and the PPT when available.</p>	<p>KCE will do so.</p>

Lisa,

We'll be sending official notices to the applicable following departments, officials, and civic groups in Ellington prior to petition submission as given in Sec. 16-50L.2b of the CT General Statutes:

"...any adjoining municipality having a boundary not more than two thousand five hundred feet from such facility, which copy shall be served on the chief executive officer of each such municipality and shall include notice of the date on or about which the application is to be filed, and the zoning commissions, planning commissions, planning and zoning commissions, conservation commissions and inland wetlands agencies of each such municipality..."

Thanks,

**Lara Rippeon**

Dear Lara,

Thank you for notice about KCE's BESS project in Willington, 2500' from the Ellington town line. Will you be sending notice to the Ellington First Selectperson or any other department or civic group in Ellington?

Thanks again!  
Kind regards,

*Lisa*

**Subject:** KCE CT 5 Project Introduction

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Ms. Houlihan,

I am writing to inform you that my company, Key Capture Energy, is proposing a battery energy storage system (BESS) at Village Hill Road in Willington. We are seeking to submit a petition for a declaratory ruling from the Connecticut Siting Council (CSC) that a certificate of compatibility and public need is not required for this project by June 16<sup>th</sup>. I wanted to provide preliminary notice with information about our project before petition submission given that the project will be within 2500 feet of the Ellington town boundary. You will also receive notice of our CSC petition when it is

submitted.

This project will be a 5 MW/20 MWh system that interconnects to the local Eversource distribution infrastructure. It will take up approximately an acre of the property that has previously been forested. We have completed major permitting studies for this project, such as a wetland delineation survey, geotechnical analysis, and civil design of the project, all of which will be included in the CSC petition. We have also met with several officials from the Town of Willington to share basic project information, including the Zoning Agent, Mike D'Amato, and Fire Marshal, Trevor Gantick. Additionally, the access road for our project will be located at 83 Village Hill Road in Stafford, so we've met with officials from that municipality as well. Finally, more details on our company, basic project information, results of permitting studies, and project safety information can be found in the attached document. Its content is very similar to what we presented to the officials from Willington and Stafford. Feel free to reach out to me at the contact information below with any questions.

Sincerely,

**Lara Rippeon**

---

**It was a pleasure to meet with you regarding your current proposed activity. Thank you to all who attended.**

In summary, Key Capture is proposing construction of battery energy storage system (BESS) projects at four sites, summarized below.

*107 Blair Road & 83 Village Hill Road, Willington/Stafford - CT 5*

A 5 MW BESS site is proposed at CT 5, which is anticipated to require 1 to 1.5 acres of disturbance. Access is proposed to be from Village Hill Road to the east through the farm area and woods around a delineated wetlands corridor utilizing an existing woods road and stream crossing that will be improved. A vernal pool survey will be performed in spring 2023. Minimal visual and noise impacts are anticipated. The interconnection will tap into the existing power line on Blair Road due to a lack of capacity in the Village Hill Road line system. Key Capture is working with the Town Planning and Fire Departments.

*57 Ruddy Ferry Road, Haddam - CT 7*

A 130 MW BESS is proposed at CT 7, also known as the “hourglass site”. All development is proposed in the northern portion of the hourglass parcel in an existing gravel pit; no work is proposed in the southern portion of the hourglass parcel, which has steep topography to the Connecticut River and wetlands. There is an existing substation located adjacent to the gravel that may be directly connected to. Access will be from Ruddy Ferry Road to the north via an existing access road. Approximately 6 acres of disturbance within the “bowl” of the gravel pit is proposed. The gravel pit has an existing drain that discharges stormwater, and a stormwater basin that has become naturalized with wetland characteristics that is proposed to be relocated. A preliminary assessment from NDDB was received on July 29, 2022, and NDDB will continue to work with the applicant. No visual impacts are anticipated as the equipment is proposed to be located within the bowl of the gravel pit and the overall area is an industrial visual area with the existing large substation adjacent to the project. Sound impacts are anticipated due to the shape and topography of the site, and mitigation methods are currently under investigation.

*44 Skinner Street, East Hampton - CT 8*

A 5 MW BESS is proposed at CT 8 in a forested, former quarry area adjacent to an existing solar array. Less than one acre of disturbance for the installation of the battery pad and interconnection are anticipated as there is an existing path to the solar facility and the site has low slopes. There are mapped NDDB areas on the site, and a final determination from NDDB was received on August 25,

2022. The BESS will interconnect independently of the existing solar site. The proposed underground tie-in to Forest Street will cross 350 ft of State-owned land, and an interconnection agreement was filed with DEEP on December 23, 2022. Visual impacts are anticipated to be limited; moderate noise impacts are expected as there are residential properties located to the north along Forest Street.

#### *2 Ella Grasso Turnpike, Windsor Locks - CT 9*

A 5 MW BESS is proposed within the existing parking area in commercial/industrial area adjacent to Rt 20 with little to no clearing or disturbance anticipated to be required. The site has an improved gravel entrance, underground detention system, and 48-inch diameter culvert at the north corner of the project site that discharges into a wetland area. The site is within a commercial area and may have limited visual and sound impacts to commercial buildings to the east.

Based upon the information presented at the meeting, a summary of the permitting requirements is as follows:

#### **Land Acquisition Management (LAM): your contact is Jamie Sydoriak**

The East Hampton site, CT 8, includes a proposal to cross 350 ft of State-owned land. The proposal to affect DEEP property will be presented at LAM's March 28, 2023 Property Management Review Committee Meeting, after which the office will determine whether the grant of easement will be made to Key Capture or its assignee. Please contact Jamie if you have any questions on the process or anticipated timeline.

#### **Natural Diversity Database (NDDB): your contact is Robin Blum**

The East Hampton site, CT 8, has received [NDDB](#) Final Determination 20220825; please follow guidelines from that determination prior to, during, and after construction.

The Haddam site, CT 7, has a preliminary determination from NDDB, and the NDDB program anticipated continuing to work with the environmental consultant toward receipt of a final determination. Please contact Robin if you have any questions or to discuss further as needed.

#### **Stormwater: your contact is Chris Stone**

Registration under the [General Permit for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities](#) is anticipated to be required for the Willington site (CT 5), Haddam site (CT 7), and potentially for the East Hampton site (CT 8). Recommendations by site are summarized below. Please reach out to Chris with any questions or to discuss further as needed.

Willington, CT 5: it is recommended to keep disturbance associated with the installation of the interconnection to the west to Blair Road to a minimum, as that portion of the property is steeply sloped and clearing the path down the hill may result in inadvertent creation of a swale or erosion gullies. It might be useful to consider installation of water bars across the interconnection path to prevent erosion associated with construction or future maintenance.

Haddam, CT 7: the existing stormwater basin appears to be a settling basin that has since naturalized with wetland features, with an existing manhole with a discharge pipe to the southeast. The manhole and discharge pipe are under consideration for future use after replication of the wetland

area in a different location. If discharge is expected from the site, which is a former sand and gravel operation, water quality volume will need to be addressed, and the Town may also request that peak volumes be addressed. Consider use of on-site infiltration for the water quality volume.

East Hampton, CT 8: ensure that a stable outlet is provided for the stormwater coming from the site, which may traverse to the small brook to the east of the property line before heading to the catch basin on Skinner Street.

**Land and Water Resources Division (LWRD): your contact is Bianca Beland**

Wetland resource area impacts and concerns are anticipated to be addressed through Connecticut Siting Council review of the proposed projects. Recommendations by site are summarized below.

Willington, CT 5: as discussed in the stormwater recommendations, please be aware of the erosion potential associated with the maintenance and vegetation management of the interconnection to Blair Road on the steep slope. The proposed use and improvement of the existing woods road and stream crossing to access the site from Village Hill Road will help to minimize impacts to the large wetland complex and potential vernal pools identified on site.

Haddam, CT 7: in the case of the proposed impacts to the existing stormwater basin that has naturalized with wetland characteristics, minimal concerns are expected if a more robust replacement wetland area is proposed as discussed as sensitive species are not likely to be impacted by the proposed activity; additional discussion may occur as part of the Siting Council application process. Please include LWRD in future conversations about the potential conservation of the southern portion of the parcel.

East Hampton, CT 8: LWRD will coordinate with LAM regarding potential questions or concerns about access across DEEP-owned land if needed.

**Office of Planning and Program Development: your contacts are Linda Brunza and Fred Riese**

It may be beneficial to include the proposal to keep the southern portion of the Haddam hourglass site undeveloped or placed into conservation in future communication with the Town and Siting Council.

**Additional Information**

The Connecticut Department of Energy and Environmental Protection (DEEP) [recently announced](#) its intention to conduct [two new procurements](#) for grid-scale zero-carbon energy resources this year as the state continues making progress on Governor Lamont's Energy Action Plan to improve energy affordability and reliability and achieve state statutory mandates for greenhouse gas emissions reduction of at least 80 percent below 2001 levels by 2050 and a 100 percent zero carbon electric sector by 2040.

On March 29, 2023, beginning at 9:30 am, DEEP will hold an all-day Zoom public Energy Procurement and Siting Workshop to describe the upcoming clean energy procurements, provide an update on best siting practices, and hear stakeholder input to inform the development of the requests for proposals (RFPs). All stakeholders are invited to join this meeting – if you are interested

in attending, please register using this link:

[https://ctdeep.zoom.us/webinar/register/WN\\_PUItxAbDQsSn-uxaJh6mXA](https://ctdeep.zoom.us/webinar/register/WN_PUItxAbDQsSn-uxaJh6mXA).

**Meanwhile, if you could help us improve our pre-application process, we would appreciate it!  
Please complete a quick [follow-up survey](#) of 5 questions!**

Thank you,  
Emily

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Selectman Wiecenski:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Mr. Heckman:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Mr. Armelin:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

State Senator Jeff Gordon  
Legislative Office Building Room 3400  
300 Capitol Avenue  
Hartford, CT 06106

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Senator Gordon:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt (“MW”) battery energy storage system to be located at Village Hill Road, Willington, Connecticut (“Property”), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council’s approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council’s website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Chairman Gillett:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt (“MW”) battery energy storage system to be located at Village Hill Road, Willington, Connecticut (“Property”), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council’s approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council’s website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Commissioner Gilman:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Property Owner:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after June 9, 2023, seeking the Council's approval of the battery energy storage project at the Property. You are receiving this notice from KCE CT 5, LLC because your property abuts the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington and Stafford. A full hard copy will be provided to the Towns of Willington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Ms. Spielman:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after July 14, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington, Ellington and Stafford. A full hard copy will be provided to the Towns of Willington, Ellington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

**Re: Battery Energy Storage Project, KCE CT 5, LLC, Village Hill Road,  
Willington / Stafford, Connecticut**

Dear Ms. Martin:

Please be advised that this office represents KCE CT 5, LLC, a subsidiary of Key Capture Energy, who are developers of battery storage systems. This letter is being sent to inform you that KCE CT 5, LLC intends to develop a 5.0-megawatt ("MW") battery energy storage system to be located at Village Hill Road, Willington, Connecticut ("Property"), near the Willington / Stafford town line.

In connection with this proposed project, KCE CT 5, LLC will be filing a petition for declaratory ruling with the Connecticut Siting Council on or after July 14, 2023, seeking the Council's approval of the battery energy storage project at the Property.

Once filed, a full digital copy of the initial Petition will be provided to the Towns of Willington, Ellington and Stafford. A full hard copy will be provided to the Towns of Willington, Ellington and Stafford if so requested. In addition, an electronic copy of the petition will be available on the Siting Council's website at [www.ct.gov/csc](http://www.ct.gov/csc). Should you have any further questions or concerns regarding this matter, please contact me at 860-424-4315 or the Connecticut Siting Council.

Sincerely,

Lee D. Hoffman

May 24<sup>th</sup>, 2023

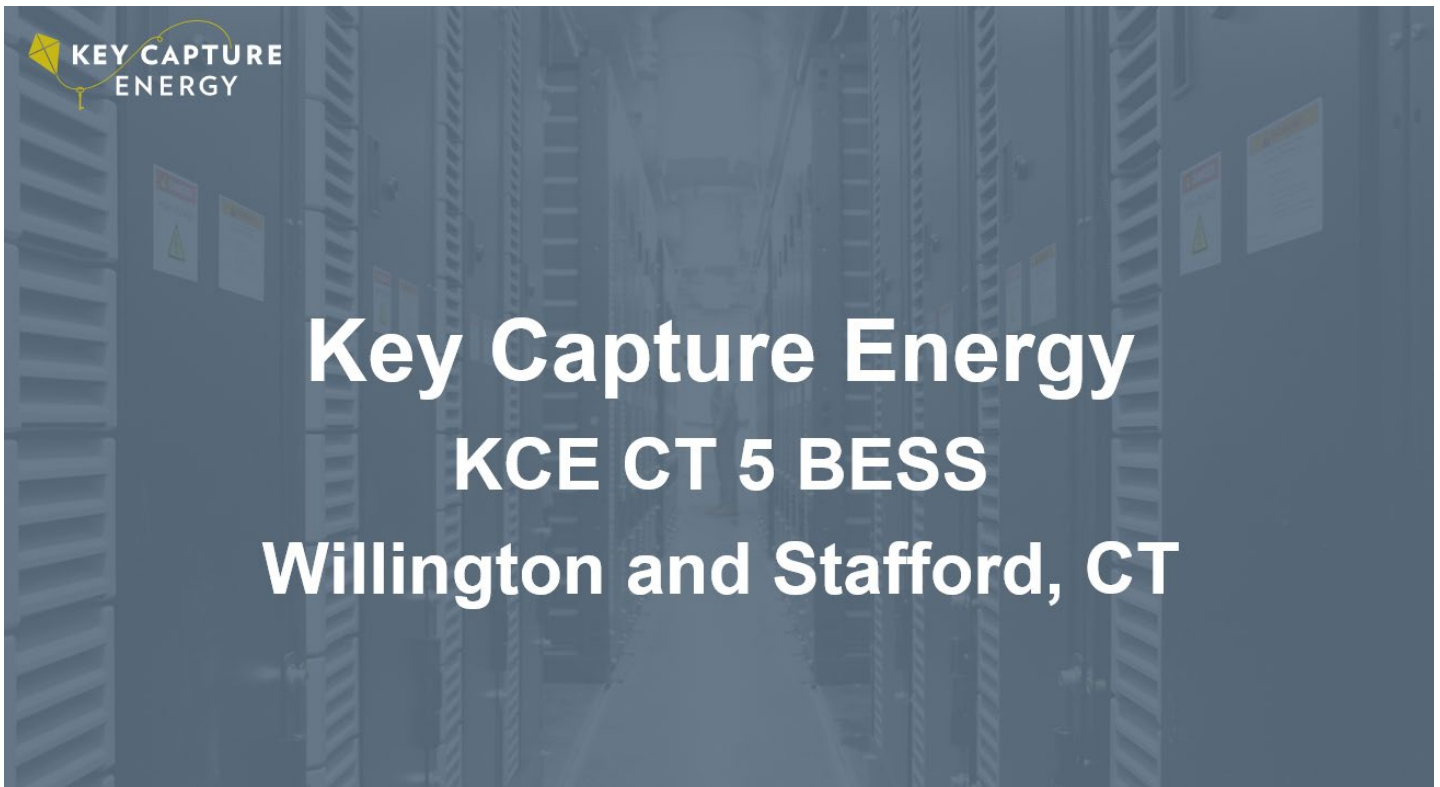

Lisa Houlihan  
Town of Ellington Town Planner  
57 Main Street P.O. Box 187  
Ellington, CT 06029

Dear Ms. Houlihan,

I am writing to inform you that my company, Key Capture Energy, is proposing a battery energy storage system (BESS) at Village Hill Road in Willington. We are seeking to submit a petition for a declaratory ruling from the Connecticut Siting Council (CSC) that a certificate of compatibility and public need is not required for this project by June 16<sup>th</sup>. I wanted to provide preliminary notice with information about our project before petition submission given that the project will be within 2500 feet of the Ellington town boundary. You will also receive notice of our CSC petition when it is submitted.

This project will be a 5 MW/20 MWh system that interconnects to the local Eversource distribution infrastructure. It will take up approximately an acre of the property that has previously been forested. We have completed major permitting studies for this project, such as a wetland delineation survey, geotechnical analysis, and civil design of the project, all of which will be included in the CSC petition. We have also met with several officials from the Town of Willington to share basic project information, including the Zoning Agent, Mike D'Amato, and Fire Marshal, Trevor Gantick. Additionally, the access road for our project will be located at 83 Village Hill Road in Stafford, so we've met with officials from that municipality as well. Finally, more details on our company, basic project information, results of permitting studies, and project safety information can be found in the attached document. Its content is very similar to what we presented to the officials from Willington and Stafford.

Sincerely,  
Lara Rippeon  
Associate, Development  
518-860-0527  
lara.rippeon@keycaptureenergy.com

**Introductions:**

Key Capture Energy (KCE) is proposing a 5-megawatt (MW) battery energy storage system (BESS) in Willington and Stafford, Connecticut. This information is being sent to the Town of Ellington as an introduction to the project. KCE has identified the Town of Ellington as an interested party because the town boundary is located less than 2,500 feet from the project location. Any questions regarding this material may directed to:

<p><b>Lara Rippeon</b> Associate, Development Key Capture Energy Phone: 518-860-0527 <a href="mailto:lara.rippeon@keycaptureenergy.com">lara.rippeon@keycaptureenergy.com</a></p>	<p><b>Paul Williamson</b> Sr. Manager, Development –ISONE Key Capture Energy Phone: 207-242-3521 <a href="mailto:paul.williamson@keycaptureenergy.com">paul.williamson@keycaptureenergy.com</a></p>
---	---

**Key Capture Energy Background:**

Key Capture Energy was founded in 2016 as a utility-scale energy storage company and is an experienced owner and operator of such projects. We currently have more than 400 MW of projects either operational or under construction in New York and Texas and over 6,000 MW of development pipeline across the United States. SK E&S, Key Capture Energy’s ultimate parent company, has deployed over \$2B in investment capital in energy storage, electric vehicle charging, hydrogen, and distributed generation in North America. Our headquarters are in Albany, NY, with additional offices in Houston and New York City.

KCE's first operational project in New York, KCE NY 1, 20 MW/14.4 MWh BESS

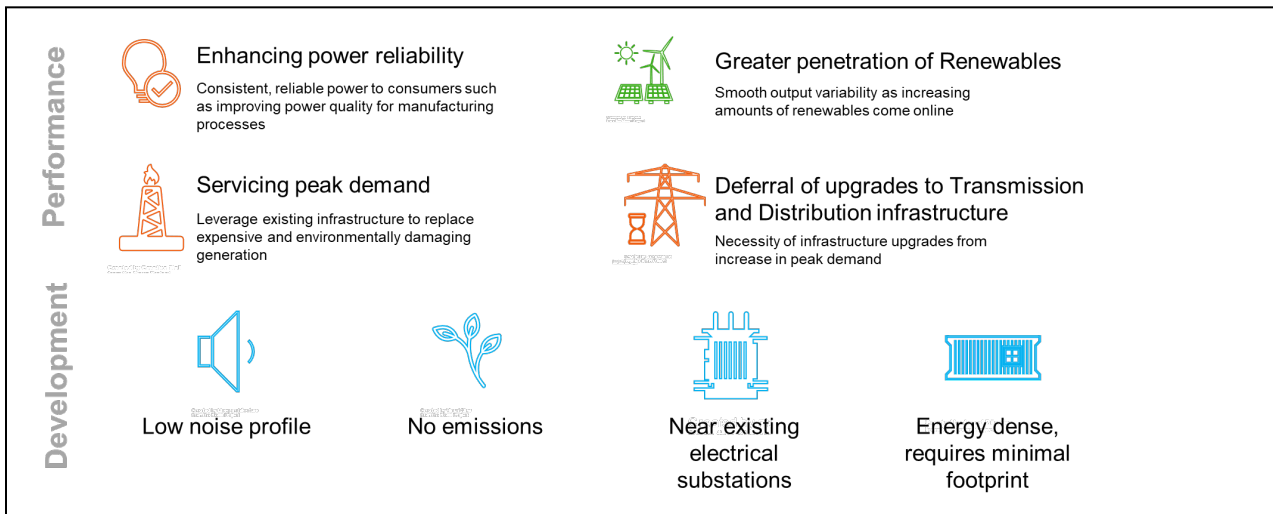

**Benefits of Energy Storage:**

Battery energy storage provides several benefits that will help modernize the electric grid, including:

- Enhancing power reliability
- Servicing (shaving) peak demand
- Greater penetration of renewable energy
- Deferring transmission and distribution infrastructure upgrades.

This project will be participating in the ISO-NE Forward Capacity Market to qualify and receive obligations to operate as a resource that can provide electricity capacity as needed during capacity scarcity events. The project is well suited to both meet the State of Connecticut Goals as well as provide the benefits of energy storage sought by Public Act 21-53. In addition, the project will not create any emissions with an impact on air quality during operations.

**KCE Connecticut and New England Activities**

The State of Connecticut recognized these previously listed benefits in Public Act 21-53. This act establishes goals of 1000 MW of energy storage in Connecticut and provides CT DEEP and

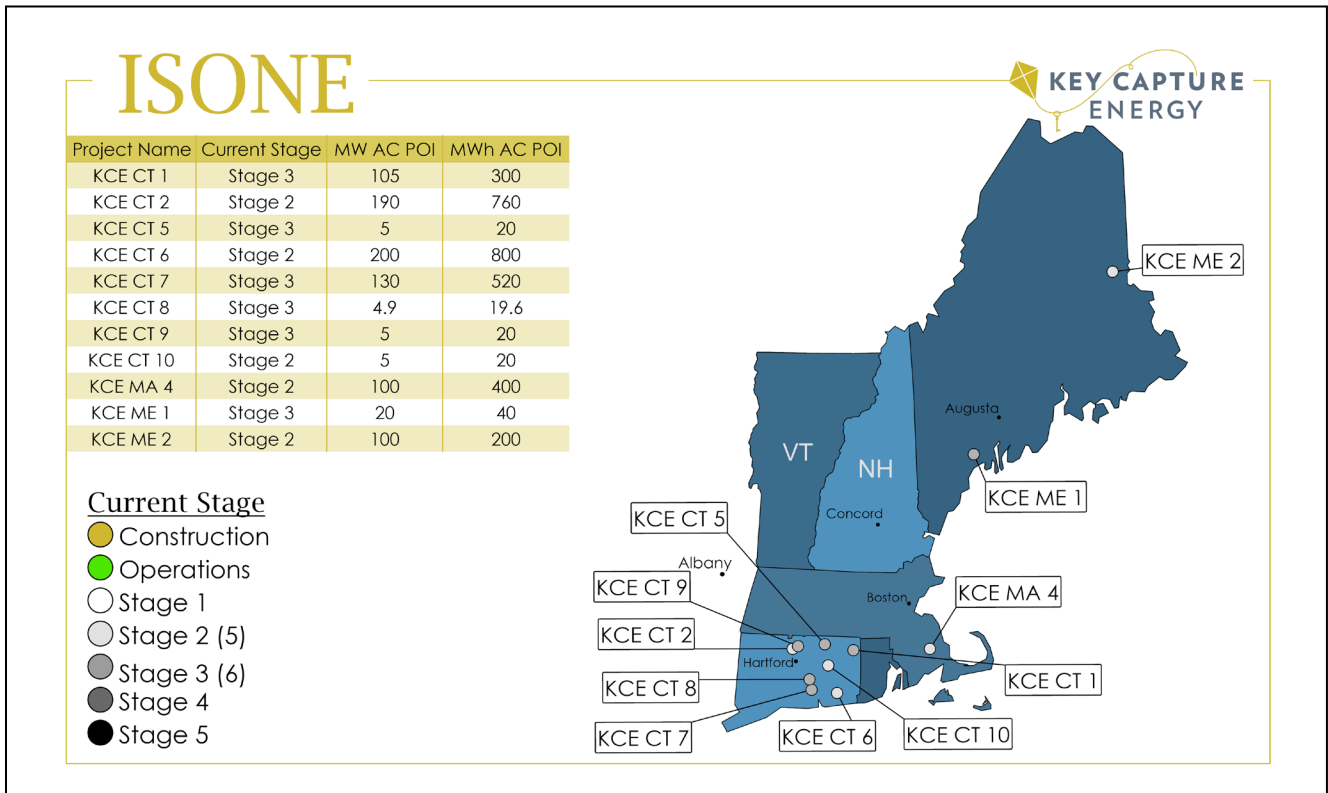

CT PURA with the authority to implement activities for the state to meet these goals, including incentivizing front of the meter (FTM) projects on the distribution network. The Project is being developed in response to the state goals as an FTM project on the Eversource 23kV 14K7 circuit.

More specifically, the Connecticut state goals are:

- 1,000 MW of deployed energy storage by 2030
- 420 MW FTM
- 580 MW Behind-the-Meter (BTM)
- Interim targets of 300 MW by 2024 and 650 MW by 2027
- State-level procurements for both small-scale (~5 MW) and large-scale (20 MW+) FTM projects

Additionally, KCE maintains a current portfolio of projects in Maine and Massachusetts and intends to add projects in all New England states before the end of the decade.

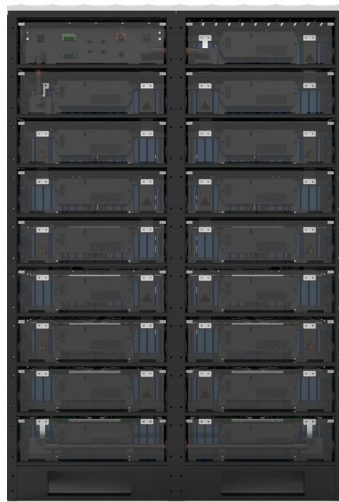

### **BESS Explained:**

- Cells are organized into modules, which each have a dedicated control system to balance load between cells

- Modules are stacked into racks, which also have a dedicated control system across modules

- State of charge, voltage, and temperature are reported to the internal Battery Management System (BMS) from rack aggregations

All racks are organized within a container, passing data to the BMS and informing automated procedures and personnel through supervisory control and data acquisition (SCADA) systems.

The containers are arranged in rows. Each container includes a liquid cooling system (HVAC). Additional equipment, such as inverters and transformers, are included in the overall system, which is surrounded by a chain link security fence.

**Project Development Cycle**

- All projects begin with a comprehensive analysis of the electrical grid, possible revenue source models, and an understanding of key trends in the political and regulatory landscape.
- Permitting and environmental / electrical due diligence before construction
- Construction start date likely in Q3/Q4 2025.
- Project comes online in Q1/Q2 2026

	Months 1-12	Months 13-24	Months 25-36
<b>Interconnection</b>	File queue requests	Eversource conducts studies to determine required system upgrades	Finalize Eversource studies and sign interconnection agreement
<b>Land</b>	Secure option to lease / purchase contract	Make option payments	Enter lease or purchase contract with owner
<b>Permits</b>	Initial meetings with local municipality and due diligence on property	Perform environmental studies, complete system design and submit permit applications	Receipt of approvals

### KCE CT 5 Permitting Track

Agency/Authority	Permit or Area of Review	Process
CT Siting Council (CSC)	Petition for a declaratory ruling that no Certificate of Environmental Compatibility and Public Need is required.  Development and Management Plan	For smaller projects hearings are typically not required, however, CSC has discretionary authority to determine if they want to request a hearing. Public notice required, individuals or towns with party status may participate in the process. Notice includes towns within 2500' of project.
Connecticut Department of Energy and Environmental Protection	Connecticut General Permit for the Discharge of Stormwater and Dewatering Wastewaters from Construction Activities- Section 404, and 33 CFR 320 et seq.	DEEP has delegated authority for Clean Water Act Section 401 Water Quality Certification.
Natural Diversity Data Base Program (NDDB)	Listed species review	Final determination required for stormwater general permit; also required for CSC petition process.
Town of Willington	<ul style="list-style-type: none"> <li>• Building Permit</li> <li>• Electrical Permit</li> </ul>	Submit to town after receipt of CSC declaratory ruling.
Town of Stafford	<ul style="list-style-type: none"> <li>• Building Permit (Access road)</li> <li>• Curb Cut</li> </ul>	Submit to town after receipt of CSC declaratory ruling.

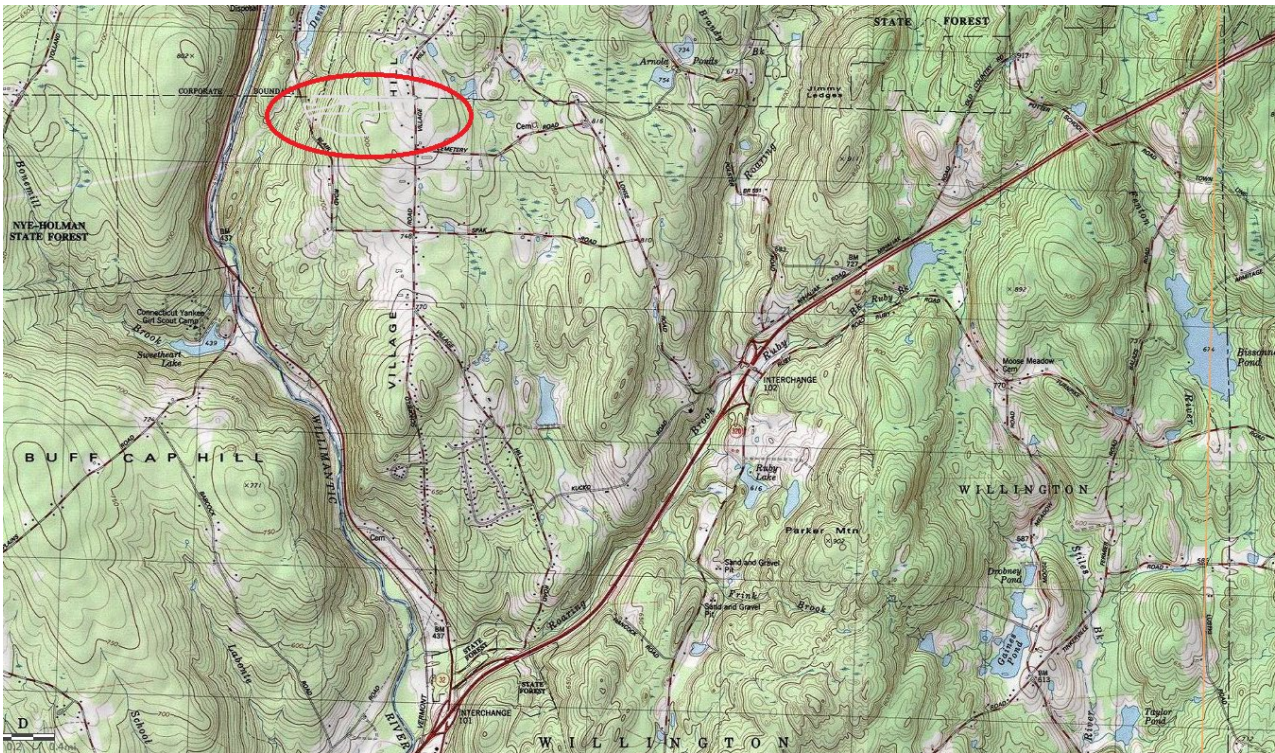

### Current Development Status

KCE CT 5 has completed the following project objectives:

- Valid and recorded land agreement with Donna DeWolf.
- Project introductory meeting with Mike D'Amato, Willington Zoning Agent, in September 2022.

- Field studies completed: Phase 1 ESA, CIA, geotech analysis, and preliminary ALTA, wetland delineation, and cultural resource surveys.
- Submitted an interconnection application to Eversource in June 2022. Expecting major study results in Q1 2024.
- CT Siting Council (CSC) submission planned for mid-June 2023.

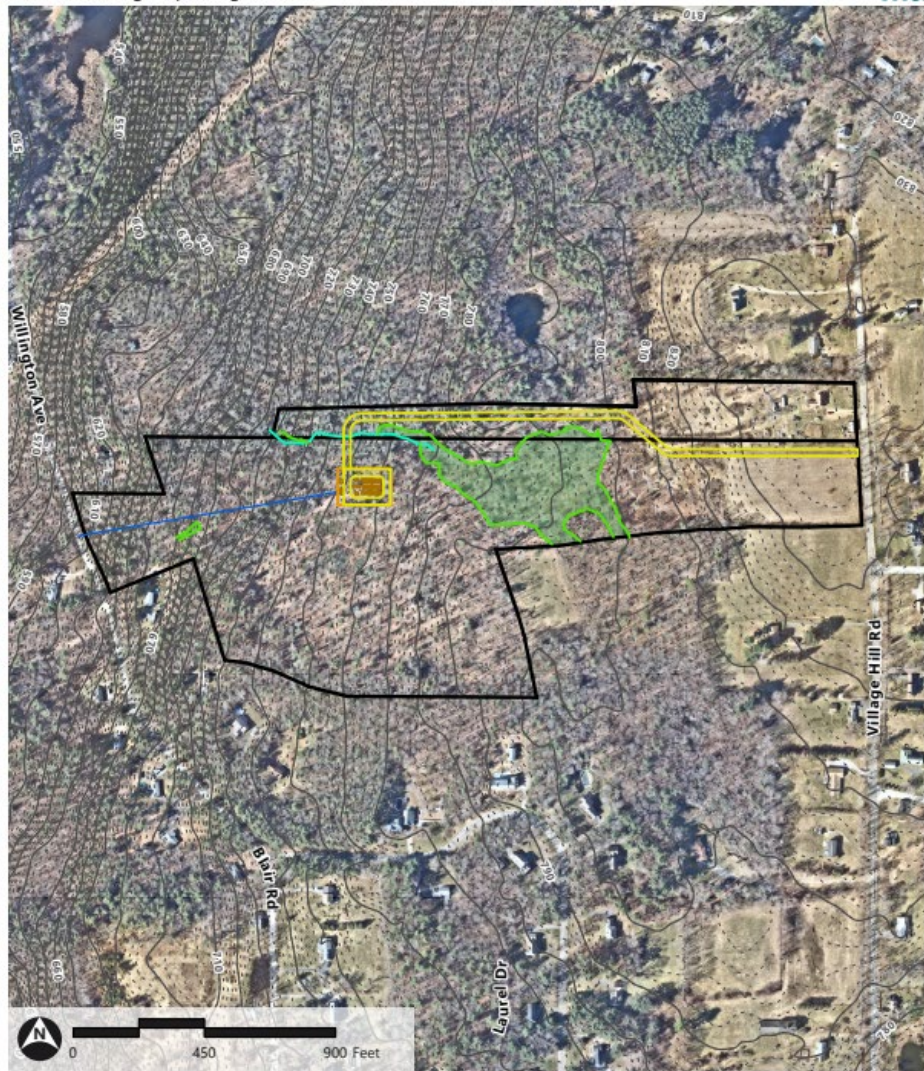

\*Project location within the Towns of Willington and Stafford, CT

- 2' Elevation Contour
- 10' Index Contour

Source: VHB, CTDEEP, ArcGIS Online

## Environmental: Wetlands

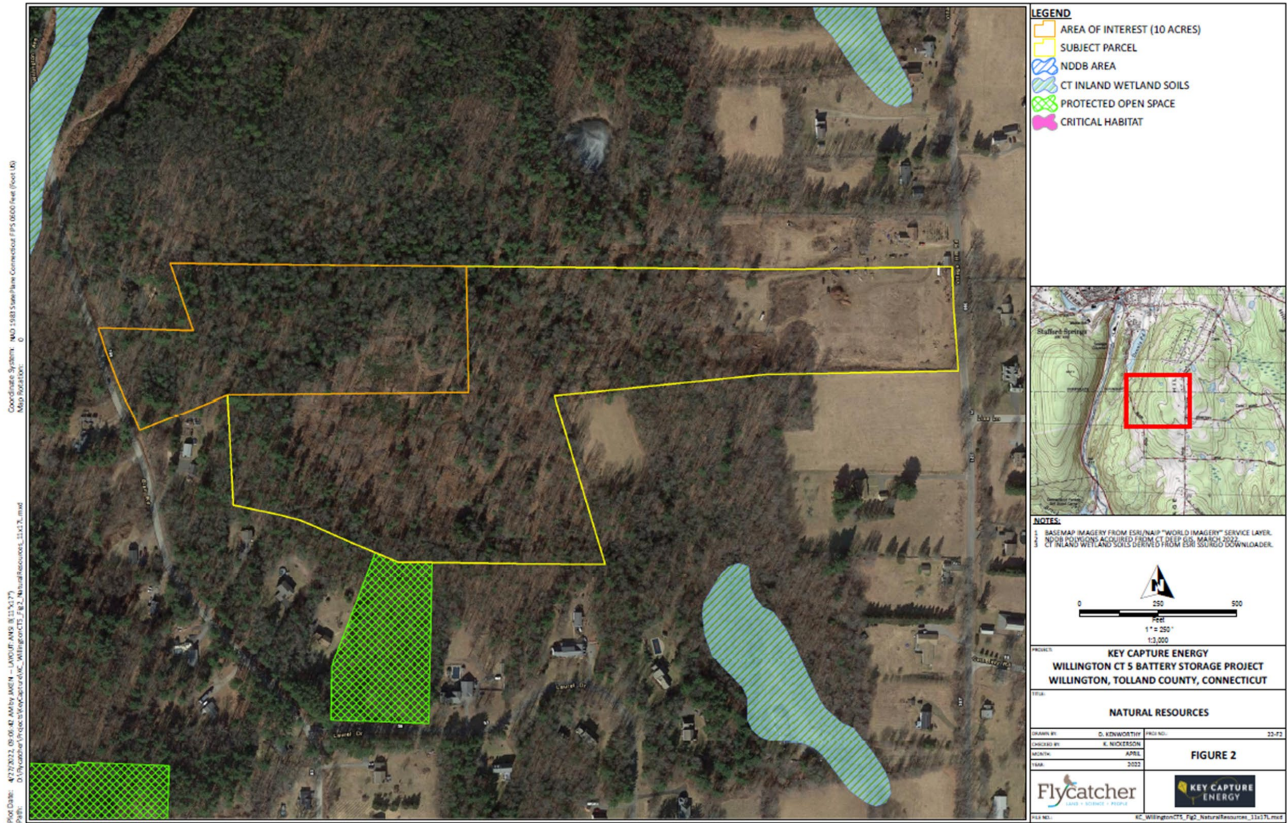

- Project avoids any wetland impacts
- Stream crossing: Existing culvert in poor condition will be replaced by project to meet current Connecticut guidelines.

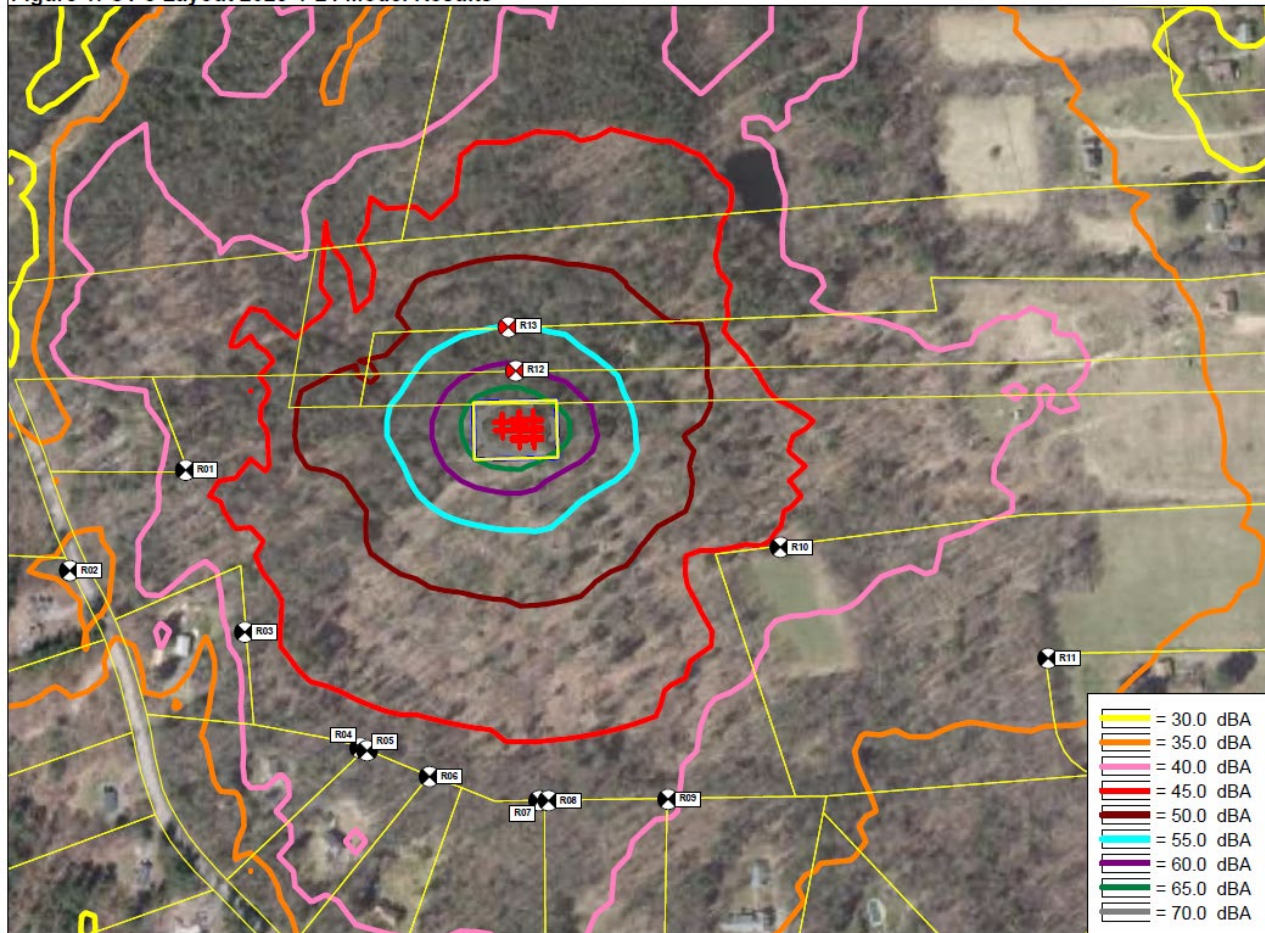

**Environmental: NDDB**

- **Project will not impact any NDDB, Critical Habitat, or other sensitive wildlife areas.**

## Environmental: Sound

Figure 1: CT 5 Layout 2023-1-24 Model Results

- State of Connecticut sound standard, industrial use to residential use: 51 dBA
- Project exceeds state standard to the north.
- Project is in compliance with state standard at all Willington parcel boundaries
- 51 dBA limit encroaches on one non-participating parcel in Stafford, Parcel 71/7, owned by Jason Zeiger.
- KCE to perform outreach to Town of Stafford and Jason Zeiger to discuss impacts of project on property and surrounding area.

## **KCE CT 5 Stakeholder Outreach Process**

### Communication and Training Throughout Project Lifecycle

1. Introductory meeting with host town officials including fire department and safety officials. KCE will develop and submit a full CSC application, site plan, equipment and materials safety information, and recommended safety response plan for input.
2. Provide introductory project information to all towns within 2,500 feet of project location.
3. CSC application will include an emergency response plan per CHAPTER 277a: PUBLIC UTILITY ENVIRONMENTAL STANDARDS ACT section 16-50l and 16-50p.
4. Project notifications as given by the Connecticut General Statutes 16-50l(2)(b) and (e) to host community, towns within 2,500 feet of project, abutters, and regional council of governments.
5. Fire department review of proposed emergency response plan.
6. Training session detailing the project, the battery technology, and all applicable fire codes and emergency response plans prior to construction with first responders, fire department, and any mutual aid departments that wish to participate.
7. Site has clear and actionable signage which includes 24/7 contact information. Routine updates and/or training performed annually or as needed.

### **Project Operations:**

Construction: Onsite personnel will call 911 in case of any emergency

Operations: BESS have two independent alarm systems:

- 1) The project includes battery management software (BMS), which monitors battery voltage, current and temperature. The software can autonomously shut down the BESS and disconnect the battery racks from the inverters.
- 2) Site level fire panel that aggregates data from each of the battery containers.

The BMS continuously communicates with a 24/7 control center. In the case of any out of the ordinary operational signal, the control center team will call Eversource and Key Capture Energy, and in the case of a fire alarm at the BESS, local emergency services. In an emergency, Eversource would dispatch a line crew to disconnect the project from the local distribution network.

Security: KCE projects include security equipment installed like lighting, cameras, and key card access.

**KCE Treats BESS Safety as a Primary Goal**

KCE’s CT projects will be designed to meet or exceed all applicable standards

<u>Applicable Code</u>	<u>Component Part Covered</u>	<u>Description</u>
2021 International Fire Code (IFC)	Whole System	
2021 International Building Code (IBC)	Whole System	
National Fire Protection Association (NFPA) 855	Whole System	Standard for the Installation of Stationary Systems
UL 9540	Whole System	Requirements for installation, providing appropriate instruction manuals
NFPA70	Whole System	Benchmark for safe electrical design, installation, and inspection
NFPA70e	Whole System	Workplace injuries and fatalities due to shock, electrocution, arc flash, and arc blast, and assists in complying with OSHA
UL 9540A	Battery Rack + enclosure	Installation ventilation requirements; fire protection (integral or external); Fire service strategy

UL 1973	Battery Rack	Test ability to withstand fire from the outside and inside of BESS without cascading between modules
UL 1741	Inverter	Inverters capable of managing grid reliability functions.
UL 1642	Battery Cell	Reduce the risk of fire or explosion and for the responder when dealing with damaged product
UL 2054	Battery Cell	Type of plastic, wall thickness, amount of non-UL qualified material used, etc
IEC 62281	Battery Cell Transportation	Safe transport as hazardous material

### **Fire Response Procedures**

Response procedures and steps:

- Isolate area of all nonessential personnel.
- Review status of both building and ESS alarm system with available data.
- Perform air monitoring of all connected spaces.
- Identify location of overheated battery.
- Isolate affected battery, string, or entire system based on the extent of damage by opening battery disconnect switches, where provided.
- Contact person or company responsible for O&M of system.
- Continue temperature monitoring to ensure mitigation of overheating condition.

### **Project Environmental Safety:**

#### **Chemical Spills During Construction and Operations**

KCE CT 5 will have a spill prevention plan in place during construction and operations to manage and respond to any incidents:

Construction

- Motor vehicle fluids
- Heavy equipment fuel/fluid spills

### Operations

- Battery coolant system fluids
- Motor vehicle fluids
- Transformer oil spill
- Spill Prevention, Control, and Countermeasure plan (SPCC) onsite
- SDS will be available onsite

The battery modules and cooling system fully are encased in the containers. The cooling system uses a mixture of ethylene glycol and water. It also includes an anti-leak design with a collection sump capable of storing 241.3% of the total volume of liquid coolant installed inside the containers.
