[Notice Criteria Tool - Desk Reference Guide V\\_2018.2.0](#)

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference [CFR Title 14 Part 77.9](#).

- You must file with the FAA at least 45 days prior to construction if:
- your structure will exceed 200ft above ground level
  - your structure will be in proximity to an airport and will exceed the slope ratio
  - your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
  - your structure will emit frequencies, and does not meet the conditions of the [FAA Co-location Policy](#)
  - your structure will be in an instrument approach area and might exceed part 77 Subpart C
  - your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
  - your structure will be on an airport or heliport
  - filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the [Air Traffic Areas of Responsibility map](#) for Off Airport construction, or contact the [FAA Airports Region / District Office](#) for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

\* **Structure Type:** SOLAR | Solar Panel ▼  
Please select structure type and complete location point information.

**Latitude:** 41 Deg 56 M 21.7 S N ▼

**Longitude:** 73 Deg 04 M 07.6 S W ▼

**Horizontal Datum:** NAD83 ▼

**Site Elevation (SE):** 1171 (nearest foot)

**Structure Height :** 20 (nearest foot)

**Is structure on airport:**  No  Yes

**Submit**

#### Results

You do not exceed Notice Criteria.
