1. Manner in which intervenor's participation is in the interests of justice and will not impair the orderly conduct of the proceedings.

Manchester Advocates for Responsible Solar Development (MARSD) is a voluntary organization that supports the siting of solar facilities at appropriate locations. MARSD believes that the adverse environmental consequences that would result from the construction and operation of the Facility would be felt by the citizenry of Manchester and the State of Connecticut more generally but most especially by the members of MARSD and other residents living close to the Facility. The participation of MARSD in this proceeding would give voice to those who would bear the greatest burden if the Facility is approved.

2. Manner and extent to which intervenor proposes to participate:

MARSD will submit testimony and evidence and will conduct cross examination of witnesses showing that this facility will cause significant adverse environmental effects.

3. Statutory authority for intervenor request:

MARSD's statutory authority to become intervenor is pursuant to CGS Sections 4-177a(b), 16-50n, and 22a-120.

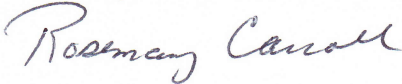

4. Nature of evidence intervenor intends to present:

MARSD plans to submit evidence that the Project would cause substantial adverse environmental effects.

Copies of this request are required to be electronically mailed to all participants on the service list of a **pending** matter, which can be found on our website in Pending Matters under the appropriate docket or petition number
