A variety of alternative sites were investigated before the Project site was selected. Several sites that were considered include:

- 1. Recycle Way in Willimantic
- 2. 73 Old Colchester Road in Lebanon
- 3. Old Dump Road in Torrington
- 4. Kement Landfill in East Windsor
- 5. The CRRA Transfer Station on Echo Lake Road in Watertown
- 6. The Norcap Landfill in East Windsor
- 7. The Paper Plant Landfill in Sprague
- 8. The Windsor Dump/Thrall Road area in Windsor
- 9. The Rocky Hill Landfill
- 10. The Tire Facility in Sterling
- 11. The Newtown Landfill in Newtown

These sites were not utilized for a variety of reasons, including: lack of suitable interconnection facilities; inability to come to accommodation with landowners with respect to lease terms; size of property was not appropriate for size of project; and environmental concerns, among other things. In addition, Lodestar reviewed the Connecticut brownfield inventory for the City of Hartford and identified numerous brownfield sites contained within the City. Each of these sites were considered for the project, however, they were not selected due to similar factors as listed above. These properties are listed on the next few pages.
