Petition 1622 Questions:

1. Looking at the schematics, it looks like the boundary lines, at times, are in the middle of the tree line. Is it the plan for CT. Solar to remove trees/bushes surrounding my property? If so, will there be plans to plant new trees around my property?
2. In addition to the natural tree line, will there be plans to add a sound buffering wall that is tall enough around my property that any noise from the solar farm will not be heard?
3. Will the noisy electrical components be encased in a sound buffering wall on three sides so that it will block any noise?
4. Will the noisy electrical components be placed away from my home and abutters properties and towards farmland owned by Foster Farms?
