# ST2752UX-US

Liquid Cooling Energy Storage System

# LOW COSTS

- Highly integrated ESS for easy transportation and O&M
- All pre-assembled, no battery module handling on site
- 8 hour installation to commission, drop on a pad and make electrical connections

# EFFICIENT AND FLEXIBLE

- Intelligent liquid cooling ensures higher efficiency and longer battery cycle life
- Modular design supports parallel connection and easy system expansion
- IP54 outdoor cabinet and optional C5 anti-corrosion

# SAFE AND RELIABLE

- Integrated DC/DC converters actively limit fault current
- DC electric circuit safety management includes fast breaking and anti-arc protection
- Multi level battery protection layers formed by discreet standalone systems offer impeccable safety

# SMART AND ROBUST

- Fast state monitoring and faults record enables pre-alarm and faults location
- Integrated battery performance monitoring and logging

# SC4000UD-MV-US SC5000UD-MV-US

Power Conversion System

# (IIII) HIGH YIELD

- Advanced three-level technology, max. efficiency 99%
- Effective forced air cooling, no derating up to 45 °C (113 °F) (SC4000UD-US)
- Wide DC voltage operation window, full power operation at 1500 V

# FLEXIBLE APPLICATION

- Bidirectional power conversion system with full four-quadrant operation
- Compatible with high voltage battery system, low system cost
- Battery charge & dis-charge management and black start function integrated

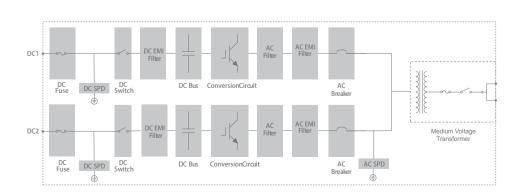

## SMART O&M

- Modular design, easy for maintenance
- High protection degree, easy for outdoor installation
- Optional C5 anti-corrosion degree, adjust to applications close to the sea

# < GRID SUPPORT

- Compliant with UL1741, IEEE1547, UL1741 SA, Rule 21 and HECO 14H
- Fast active/reactive power response
- L/HVRT, L/HFRT, soft start/stop, specified power factor control and reactive power support

## Extruded Insulation Shield (EIS):

 Thermoset semi-conducting polymeric layer free stripping from insulation

## Metallic Shield:

5 mil annealed copper tape with an overlap of 25%

## Jacket:

Low-friction, lead-free, flame-retardant, moisture-and sunlight-resistant Polyvinyl Chloride (PVC)

### Options:

STRANDFILL® - blocked conductor. Tested in accordance with ICEA T-31-610

## Applications:

Superior performance in petrochemical plants, pulp and paper mills, sewage and water treatment plants, environmental protection systems, railroads, mines, utility power generating stations, steel mills, textile plants and other industrial three-phase applications

- For use in aerial, conduit, open tray and underground duct installations
- . For use in direct burial if installed in a system with a ground conductor that is in close proximity, and conforms with NEC 250.4(A)(5)

#### Features:

- Rated at 105°C High Speed low friction technology for easy
- cable pulling Excellent heat, moisture and sunlight resistance
- Excellent flame resistance
  Outstanding corona resistance
- Flexibility for easy handling
- High dielectric strength
  Low moisture absorption
- Electrical stability under stress
- Low dielectric loss
  Chemical-resistant
- Meets cold bend test at -35°C
- 105°C rating for continuous operation
  140°C rating for emergency overload conditions
- · 250°C rating for short circuit conditions

- ICEA S-93-639/NEMA WC74
- ICEA S-97-682
- AEIC CS8
- UL listed as Type MV-105 for use in accordance with NEC, UL File # E90501 UL 1685 UL Flame Exposure Test
- IEEE 1202 (70,000 BTU/hr)/CSA FT4
  EPA 40 CFR, Part 261 for leachable lead content
- per TCLP method
- OSHA Acceptable RoHS Compliant

### Packaging:

- Material cut to length and shipped on non-returnable wood reels. Lengths in excess of
- 10,000 lbs. are provided on returnable steel reels that require a deposit Extra charges apply for cuts less than 1000 ft, lagging, pulling eyes, paralleling and triplexing

Dimensions and weights are nominal. Subject to industry tolerances.

\* Non-stock item; minimum runs apply. Please consult Customer Service for price and delivery

(1) Ampacities are in accordance with Table 301.66(C)(74) of the NEC for triplexed or three single conductor aluminum cables in isolated conduit in air based on a conductor temperature of 90°C (194F) or 105°C (221F), temperature denoted in column header, and an ambient air temperature of 40°C (104F).

and earth thermal resistance (rho) of 90.

and can't infinite research (mo) of all. (3) Ampacities are based on single conductor Type MV-105 sizes #1/0 AWG and larger in an uncovered tray in accordance with Section 392.80(B)(2) of the NEC at an ambient air temperature of 40°C (104°F) the ampacities are based on 75% of the values per Table 310.60(C)(70), operating temperature denoted in column header. For cable trays with unventilated covers for more than 6 feet, the ampacities shall not exceed 70% of the values per Table 310.60(C)(70).

(4) Based on nominal cable diameters, three single cables in the duct (PVC Schedule 40) with no ground wire and a maximum of 40% fill. Jam ratio has been considered but should be checked for individual installations. V 100% insulation level is available upon request. VY 133% insulation level is available upon request.

Note: a) Sizes smaller than 1/0 AWG do not include "FOR CT USE". b) The NESC Lightning bolt symbol is on all Uniblend<sup>®</sup> constru netru ctione

**SPEC 6560**
