New Britain, CT 06051

Re: PETITION NO. 1661 – The Connecticut Light and Power Company d/b/a Eversource Energy petition for a declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the proposed Stamford Underground Cable Modernization Project consisting of the replacement and partial relocation of its existing 115-kilovolt (kV) 1753 and 1792 high pressure fluid filled (HPFF) electric transmission cables with cross linked polyethylene (XLPE) electric transmission cables along approximately 5.2 miles of existing and new right-of-way between Cedar Heights Substation and Glenbrook Substation in Stamford, Connecticut, and related electric transmission line and substation improvements.

Compliance with Condition No. 9 – Start of Construction

Dear Attorney Bachman:

On September 5, 2025, the Siting Council considered and ruled that the above-mentioned Project would not have a substantial adverse effect, and pursuant to Connecticut General Statutes §16-50k, would not require a Certificate of Environmental Compatibility and Public Need with certain Conditions to be met for the Project.

In accordance with Petition Condition 9, as required prior to commencement of construction:

- Eversource hereby provides this written notice to the Council that construction work will commence in two weeks.

An electronic copy of this correspondence will be accompanied by a paper copy to your office. Should you have any questions, please do not hesitate to contact me.

Sincerely,

Deborah Denfeld
Team Lead – Transmission Siting
