1. Introduction

This Spill Prevention and Materials Storage Plan was developed for the construction of a 4.975 MW ground mounted solar array on the Town of Groton landfill, located at 685 Flanders Road, in Groton, Connecticut.

2. General Requirements

The project's location is proximate to sensitive environmental features and as such the Contractor is required to take precautions related to the storage of petroleum materials and equipment refueling. The Contractor is responsible for containing and properly cleaning up any inadvertent fuel or petroleum (i.e., oil, hydraulic fluid, biodegradable transformer insulating fluid, etc.) spill.

The Contractor shall not keep any above ground fuel or oil storage onsite greater than 1,320 gallons in cumulative volume.

The Contractor is responsible for keeping and maintaining a spill containment kit on Site for the duration of the construction of the project. The spill containment kit shall consist of a sufficient supply of absorbent pads and absorbent material, as well as contain this Spill Prevention and Materials Storage Plan. In addition, a waste drum will be kept on site to contain any used absorbent pads/material for proper and timely disposal off site in accordance with applicable local, state, and federal laws.

The Contractor shall make all workers and subcontractors on Site aware of this Spill Prevention and Materials Storage Plan and shall include it as part of their job briefings.

3. Specific Spill Response and Material Handling Procedures

The Contractor should adhere to the following spill response and material handling procedures.

Refueling and Material Storage

- All light duty construction support vehicles shall be fueled off site at a service station.
- Refueling of machinery on site shall take place in a supervised manner to avoid any overfills.
- Refueling of machinery shall take place on an impervious pad with secondary containment designed to contain petroleum fuels.
- Any refueling tanks and/or drums or other hazardous materials that must be kept on site shall be stored on an impervious surface utilizing secondary containment and be kept at least 100 feet from any wetlands or water courses located on site.
- All the on-site refueling and materials storage shall be within the paved area of the adjacent transfer station. No refueling or storage is permitted within the capped landfill area

Initial Spill Response Procedure

- Immediately stop operation and shut off all equipment
- Remove any sources of ignition
- Locate the source of the spill and contain and/or stop the spill from continuing
- Once the spill is stopped or contained, follow any flow paths of the spill and prevent or contain any further release into sensitive environmental areas.
- Ensure that all contractors and subcontractors on site are notified of the spill.

Spill Clean Up

- Obtain the Spill Response Kit from the designated location on Site
- Place the absorbent materials directly on the spill
- Continue to place the absorbent materials around the spill to prevent any further release
- Ensure that the spill is eliminated or isolated at the source
- Determine the type and approximate amount of material that was spilled
- Contact the appropriate Site contacts and local, state, and/or federal agencies as required.
- Contact a disposal company to properly dispose of any contaminated materials
- Fill a report on the incident.

Reporting

- Complete an incident report for each spill
- Submit a completed incident report to local, state and federal agencies, as required.
- The Connecticut Department of Energy & Environmental Protection (DEEP), Emergency Response Unit should be contacted at: (860) 424-3338, in the event of an emergency spill

4. Site and Emergency Contact Information

Project Owner: VCP Groton LF, LLC Phone: (860) 288-7215	Local Fire Department: Richard Branche, Fire Marshall Phone (non-emergency): (860)445-5775 Phone (emergency): 911
Project Site Contact: VCP Groton LF, LLC Name: Dan Sheridan – Project Superintendent Phone: 860.336.7244	Local Police Department: L.J. Fusaro, Chief of Police Phone (non-emergency): (860)441-6712 Phone (emergency): 911
Construction Oversight Contact: VCP Groton LF, LLC Name: Steven DeNino, Chief Operating Officer Phone: (860) 288-7215	State Agency: Connecticut Department of Energy & Environmental Protection (DEEP), Emergency Response Unit Phone: (860) 424-3338 Alternate Phone: (860) 424-3333
Spill Clean Up Contractor: Clean Harbors Environmental 51 Broderick Road, Bristol, CT 06010 Phone: (860) 583-8917	

5. Incident Report Template

VCP Groton LF - Spill Report Form

Date of Spill: _____ Date of Spill Discovery: _____

Time of Spill: _____ Time of Spill Discovery: _____

Name and Title of Discoverer: _____

Type of material spilled and manufacturer's name: _____

Legal Description of spill location to the quarter section: _____

Directions from nearest community: _____

Estimated volume of spill: _____

Weather conditions: _____

Topography and surface conditions of spill site: _____

Spill medium (pavement, sandy soil, water, etc.): _____

Proximity of spill to surface waters: _____

Did the spill reach a waterbody? _____ Yes _____ No

If so, was a sheen present? _____ Yes _____ No

Describe the causes and circumstances resulting in the spill: _____

Describe the extent of observed contamination, both horizontal and vertical: _____

Describe immediate spill control and/or cleanup methods used and implementation schedule: _____

Status of cleanup actions: _____

Name and Company for the following:

Construction Superintendent: _____

Spill Coordinator: _____

Verogy Representative: _____

Person Who Reported the Spill: _____

Environmental Inspector: _____

Form completed by: _____ Date: _____

Spill Coordinator must complete this for any spill, regardless of size, and submit the form to the Verogy Representative within 24 hours of the occurrence.
