Melanie Bachman, Esq.  
Executive Director  
Connecticut Siting Council  
10 Franklin Square  
New Britain, CT 06051

**Re: Petition 1684 – Greenskies Clean Energy LLC petition for a declaratory ruling, pursuant to Connecticut General Statutes §4-176 and §16-50k, for the construction, maintenance and operation of a 4.625-megawatt AC solar photovoltaic electric generating facility and associated equipment located on two parcels (Parcel Nos. 21-19-29 and 21-19-2) off Gager Hill Road, Scotland, Connecticut, and associated electrical interconnection.**

Dear Ms. Bachman:

I am writing on behalf of my client, Greenskies Clean Energy LLC (“Greenskies” or the “Petitioner”), in connection with the above-referenced Petition. On December 11, 2025, the Connecticut Siting Council (the “Council”) issued a declaratory ruling approving the Petition, subject to a variety of conditions. The Petitioner respectfully requests that Council staff review the submittals enclosed with this letter and approve its pre-construction conditions as described herein.

Pursuant to Condition #6, in **Exhibit A**, the Petitioner provides final project site plans, which also address Conditions #4 (related to high voltage and fence signage) and #5 (related to use of natural fiber erosion control). The final site layout uses 530 and 540-watt modules, which result in a 4.625MW AC project within the approved project footprint. Pursuant to Condition #3, in **Exhibit B**, Greenskies has provided the final structural design for the racking system stamped by a Connecticut licensed professional engineer. In compliance with Condition #7, in **Exhibit C**, the Petitioner provides Revised Landscaping and Visual Mitigation Plans. In compliance with Condition #11, in **Exhibit D**, the Petitioner has provided Revised Toxicity Characteristic Leaching Procedure (TCLP) test results. Finally, Greenskies provides its final Spill Prevention Plan in **Exhibit E**.

In conformance with Council regulations, the Petitioner hereby notifies the Council that it intends to commence pre-construction site mobilization activities on or about April 27, 2026. Greenskies has submitted its Stormwater General Permit Application to the Department of Energy and Environmental Protection (“DEEP”), and understands there is a significant backlog due to recently

implemented software changes at DEEP. The Petitioner will not commence land disturbance activities until it receives its Stormwater Permit and submits the same to the Council pursuant to Condition #2. However, the Petitioner is seeking approval from the Council to commence activities that do not involve land disturbance prior to its receipt of the Stormwater Permit.

With this letter, I am including the original and two hard copies of the above-referenced materials. Electronic copies of this filing and related exhibits are available for download at the following link: <https://pullcom.sharefile.com/d-s87ca599fbe594e82b7a411943637e0d5>.

Should you have any questions concerning this submittal, please contact me or Kate Boucher of this office at your convenience.

Sincerely,

A handwritten signature in black ink that reads "Lee D. Hoffman". The signature is written in a cursive style with a large, stylized "L" and "H".

Lee D. Hoffman
