Hello Mr. Smith,

Happy New Year. Based on the submitted information, if the applicant is proposing only timber piles within the existing wetland and will be adhering to the proposed resource protection notes on sheet #2.32 of the plans provided, it appears that this proposed activity will not require a Section 404 permit authorization. If the applicant is proposing any fill activities within Section 404 waters, then a permit would be required. Let me know if I can be of further assistance.

Thanks,

Kelly Egan, M.S.

Project Manager | Section 408 Coordinator
