Re: Guilford High School Battery Energy Storage Project

Dear Ms. Bachman:

The Town of Guilford has been working closely with SMS CT MG02A, LLC in its plan for the installation of a 1,927 kW/3,854 kWh AC battery energy storage facility, electrical interconnection and associate equipment to be located at 605 New England Road in Guilford, CT at the Guilford High School.

The Town has met with representatives from the project on several occasions and the Town has appreciated the developer's collaborative outreach efforts. The Town is comfortable in taking the position that this project is in the best interests of the Town and will provide significant fiscal and conversation benefits to the School District. If the project is approved by the Council, it will deliver additional tax revenue to the Town and encourage the development of and contribute to Connecticut's clean energy future. This is a unique opportunity to bring all the environmental and financial benefits together under one project.

The Town supports the Connecticut Siting Council approval of this Project, and we are looking forward in anticipation to the start of its construction.

Very truly yours,

Clifford Gurnham
