New Britain, CT 06051

Re: Docket No. 272: The Connecticut Light and Power Company and The United Illuminating Company Application for a Certificate of Environmental Compatibility and Public Need for the construction of a new 345-kV electric transmission line and associated facilities between the Scovill Rock Switching Station in Middletown and the Norwalk Substation in Norwalk, including the reconstruction of portions of existing 115-kV and 345-kV electric transmission lines, the construction of Beseck Switching Station in Wallingford, East Devon Substation in Milford, and Singer Substation in Bridgeport, modifications at Scovill Rock Switching Station and Norwalk Substation, and the reconfiguration of certain interconnections

Dear Ms. Katz:

In its notice dated December 9, 2003, the Connecticut Siting Council (“Council”) requested that The Connecticut Light and Power Company and The United Illuminating Company (“the Companies”) provide:

the legal interpretation for property, including Town and State roads, being considered for use as a substation or transmission line right of way in the application. The applicant should also list all properties being considered and state whether agreements for lease or ownership have been established or not.

The Companies subsequently obtained clarification that the Council was seeking both a legal memorandum regarding the Companies’ rights to acquire property and use public roads for the Middletown to Norwalk Project (“the Project”), as well as

**Connecticut
Light & Power**

The Northeast Utilities System

The United Illuminating Company

factual information regarding property rights that the Companies would need to acquire for the Project. The Companies complied with the former request on December 22, 2003, when they filed a Memorandum Concerning Eminent Domain Powers and Franchise Rights to Install Facilities in Highways.

The Companies have not entered into any agreements for lease or ownership of any of the property rights needed for the Project. With regard to the Siting Council's request for specific information regarding the property rights needed for the Project, enclosed are four copies and an electronic copy of the following information:

- Exhibit 1 contains information about property needed for the Proposed Route, including the Supported Changes. Exhibit 1 includes a spreadsheet and corresponding aerial maps. The spreadsheet is a multi-page spreadsheet listing each affected parcel, the property address, the type of property interest needed (i.e., easement or fee simple interest), the intended use, and the owner of record (including mailing address). This spreadsheet contains references to the corresponding aerial maps that are also included in Exhibit 1. The aerial maps can be used to identify the location of a particular property.

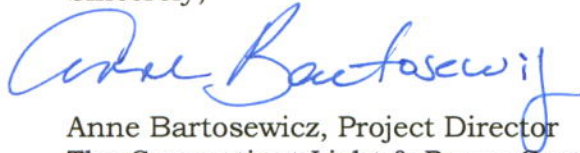

Please note that the aerial maps found in Exhibit 1 were prepared using the 400 scale and 100 scale aerial maps previously provided in Volumes 9, 11, and 12 of the Application, with certain information added to make the maps more useful for this filing. Specifically, the Companies have added more property lines to these maps, have provided more references to map/block/lot numbers of particular parcels, and have added markings to identify areas between Scovill Rock Switching Station and Chestnut Junction where expansion of the existing ROW affects property owned by CL&P.

- Exhibits 2 and 3 contain summary information regarding the property needed for Alternative A (Exhibit 2) and for Alternative B (Exhibit 3). Although the spreadsheets found in Exhibits 2 and 3 do not contain the same level of detail as is found in Exhibit 1 for the Proposed Route, Exhibits 2 and 3 do provide the following information for each segment of Alternative A and Alternative B: (i) the width of the right of way (ROW) expansion needed; (ii) the location of the expansion relative to the existing ROW; (iii) the number of parcels affected; (iv) the number of homes and/or commercial structures that would have to be acquired; and (v) the approximate number of acres that would have to be acquired.

Due to the bulk nature of the aerial maps included in this filing, the Companies request bulk filing status for this filing. All parties and intervenors will be provided electronic copies of the spreadsheets included in this filing. In addition, if any

parties or intervenors would like electronic copies of the aerial maps on CD-ROM, please contact Sharon Castater of Northeast Utilities at (203) 665-5024 or castasj@nu.com.

Sincerely,

Anne Bartosewicz, Project Director
The Connecticut Light & Power Company
Company

John J. Prete, Project Director
