Re: Docket 272: Proposed Revisions to CL&P's Development and Management Plan for Segment 4a (Singer Substation to Fairfield/Westport Town Line)

Dear Chairman Katz:

On February 22, 2006, the Connecticut Siting Council ("Council") considered and conditionally approved the Development and Management Plan ("D&M Plan") filed by The Connecticut Light and Power Company for construction of a 345-kV XLPE transmission cable system in Segment 4a in Bridgeport and Fairfield. Subsequently CL&P filed revised Segment 4a D&M Plans containing changes associated with technical issues relating to allowable impedance values on May 2, 2006 and received Council approval on May 19, 2006.

Based on additional reviews and input from the Connecticut Department of Transportation and Southern Connecticut Gas Company (SCGC), CL&P has made minor revisions to the alignment of the duct bank system and vaults at intersections and the type of backfill used around SCGC facilities.

CL&P has revised the D&M Plan drawings for Segment 4a to reflect the changes described above. Enclosed are four copies of sheets 77 through 83 of Volume II depicting the changes. CL&P submits these revisions to the Segment 4a D&M Plan for approval pursuant to the Change Approval Procedure set forth in Appendix C of CL&P's Segment 4a D&M Plan (which is identical to the procedure set forth in each of CL&P's D&M Plans filed in this docket). CL&P deems this change "minor" as that term is used in the D&M Change Approval procedure.

middletown | norwalk

As set forth in Section 2.11 of Volume 1 of the approved Segment 4a D&M plans, CL&P is also including an aerial map (Figure 1) indicating the material storage and lay-down area located in Bridgeport at the corner of Pine Street and Bostwick Street, that the underground civil contractor will use for the construction of the underground transmission lines.

Sincerely,

Albert W. Cretella, III
Middletown-Norwalk Project Manager
