Re: Docket No. F-2008 - Connecticut Siting Council Review of the Ten-Year
Forecast of Connecticut Electric Loads and Resources – Dominion Nuclear
Connecticut, Inc.

Dear Chairman Caruso:

Pursuant to the provisions of Section 16-50r of the Connecticut General Statutes, Dominion Nuclear Connecticut, Inc. (DNC) submits the attached report of its ten-year forecast of loads and resources. DNC is the majority owner and licensed operator of Millstone Power Station located in Waterford, Connecticut. In accordance with the Council's instructions, an original and 20 copies are enclosed.

Please contact Mr. Daniel A. Weekley, Managing Director, Northeast Government Affairs at (860) 444-5271 with questions or if additional information is needed.

Sincerely,

J. Alan Price
Site Vice President – Millstone

Enclosure: as stated

IN RE: : Docket No. F-2008

REVIEW OF THE TEN-YEAR FORECAST :
OF CONNECTICUT ELECTRIC LOADS :
AND RESOURCES :

February 29, 2008

REPORT OF FORECAST OF LOADS AND RESOURCES
DOMINION NUCLEAR CONNECTICUT, INC.

Pursuant to the provisions of Section 16-50r of the General Statutes, Dominion Nuclear Connecticut, Inc. (DNC), the operator of Millstone Power Station (Millstone), hereby submits this report of its ten-year forecast of loads and resources. Millstone consists of three power generating units. Millstone Unit 1, which is owned in its entirety by DNC, permanently ceased operations in 1998. Millstone Unit 2 is owned, in its entirety, by DNC. DNC owns 93.47% of Millstone Unit 3. The remaining interest in Unit 3 is owned by the Massachusetts Municipal Wholesale Electric Company (4.8%) and Central Vermont Public Service Corporation (1.73%).

(1) A Tabulation of Estimated Peak Load, Resources and Margins for Each Year

Millstone Units 2 and 3 are DNC's sole power generating assets in the State of Connecticut. DNC acquired Millstone on March 31, 2001, acquiring rights to all generation beginning April 1, 2001. Millstone Unit 2 has the capacity to generate 883.5 net megawatts (MW) of electricity and Unit 3 has the capacity to generate 1156.5 net MW of electricity.

DNC, as a wholesale power producer, does not have a franchise territory within which it would estimate peak load requirements or margins for the period 2007 through 2016, and therefore, no such estimates are offered.

(2) Data on Energy Use and Peak Loads for the Five Preceding Calendar Years

As stated in DNC's February 26, 2004, submittal, in the time period February 1, 2003 to January 31, 2004, Millstone generated 16,145,175 megawatt-hours of electricity for sale into the New England power grid.

As stated in DNC's February 25, 2005, submittal, in the time period February 1, 2004 to January 31, 2005, Millstone generated 16,542,323 megawatt-hours of electricity for sale into the New England power grid.

As stated in DNC's February 23, 2006, submittal, in the time period February 1, 2005 to January 31, 2006, Millstone generated 15,573,025 megawatt-hours of electricity for sale into the New England power grid. Millstone generated 15,571,841 megawatt-hours of electricity in calendar year 2005 (January 1, 2005 through December 31, 2005).

As stated in DNC's February 23, 2006, submittal, in the time period January 1, 2006 to December 31, 2006 (calendar year 2006), Millstone generated 16,589,445 megawatt-hours of electricity for sale into the New England power grid.

In the time period January 1, 2007 to December 31, 2007 (calendar year 2007), Millstone generated 16,384,495 megawatt-hours of electricity for sale into the New England power grid.

On July 13, 2007, DNC filed an application with the NRC to increase the overall generating capacity of Millstone Unit 3 by 7% or approximately 80 megawatts. DNC anticipates final NRC approval in the 3rd quarter of 2008. If NRC approval is received in the 3rd quarter of 2008, the increase in output could feasibly be delivered as early as the end of 2008.

(3) A List of Existing Generating Facilities in Service

Millstone Unit 2	883.5 MW Generating Capacity
Millstone Unit 3	1156.5 MW Generating Capacity

(4) A List of Scheduled Generating Facilities For Which Property Has Been Acquired, For Which Certificates Have Been Issued, and For Which Certificate Applications Have Been Filed.

None.

(5) A List of Planned Generating Units at Plant Locations For Which Property Has Been Acquired, or at Plant Locations not Yet Acquired, That Will Be Needed to Provide Estimated Additional Electrical Requirements, and the Location of Such Facilities.

None.

(6) A List of Planned Transmission Lines on Which Proposed Route Reviews Are Being Undertaken or For Which Certificate Applications Have Already Been Filed.

None.

- (7) **A Description of the Steps Taken to Upgrade Existing Facilities and to Eliminate Overhead Transmission and Distribution Lines in Accordance with the Regulations and Standards Described in Section 16-50t.**

None.

- (8) **Private Power Producers**

Not applicable.

Respectfully submitted,

DOMINION NUCLEAR CONNECTICUT, INC.
