

CT DPH and COVID-19 Data

DPH has updated and streamlined the reporting of COVID-19 cases, deaths, and testing data on the Open Data Portal. As of 6/27/2022, the data will be published in four tables instead of twelve.

The **COVID-19 Cases, Deaths, and Tests by Day** dataset contains cases and test data by date of sample submission. The death data are by date of death. This dataset is updated daily and contains information back to the beginning of the pandemic. The data can be found at <https://data.ct.gov/Health-and-Human-Services/COVID-19-Cases-Deaths-and-Tests-by-Day/g9vi-2ahj>.

The **COVID-19 State Metrics** dataset contains over 93 columns of data. This dataset is updated daily and currently contains information starting June 21, 2022 to the present. The data can be found at <https://data.ct.gov/Health-and-Human-Services/COVID-19-State-Level-Data/qmgw-5kp6>.

The **COVID-19 County Metrics** dataset contains 25 columns of data. This dataset is updated daily and currently contains information starting June 16, 2022 to the present. The data can be found at <https://data.ct.gov/Health-and-Human-Services/COVID-19-County-Level-Data/ujjq-dy22>.

The **COVID-19 Town Metrics** dataset contains 16 columns of data. This dataset is updated daily and currently contains information starting June 16, 2022 to the present. The data can be found at <https://data.ct.gov/Health-and-Human-Services/COVID-19-Town-Level-Data/icxw-cada>. To protect confidentiality, if a town has fewer than 5 cases or positive NAAT tests over the past 7 days, those data will be suppressed.

The COVID-19 Data Report is posted on the Open Data Portal every day at 3pm. The report uses data from multiple sources, including external partners; if data from external partners are not received by 3pm, they are not available for inclusion in the report and will not be displayed. Data that are received after 3pm will still be incorporated and published in the next report update.

The hospitalization data comes from the Connecticut Hospital Association. To see hospitalization data from previous days, please refer to the COVID-19 State Level dataset (<https://data.ct.gov/Health-and-Human-Services/COVID-19-State-Level-Data/qmgw-5kp6>). Data that are received after 3pm will be reflected in the next report update.

New to using the Open Data Portal? This [site](#) has information on how to access and interact with data on the CT Open Data Portal.

The following datasets are being archived. These datasets are no longer being updated but will remain on the Open Data Portal. Additionally, most of the data elements contained in these datasets are presented in the four new datasets listed above.
