

Kronos Scheduler: Scheduler Reports Guide

Purpose

The Workforce Central suite components generate numerous reports, most of which are standard to the components. This document includes reports focused on Scheduler.

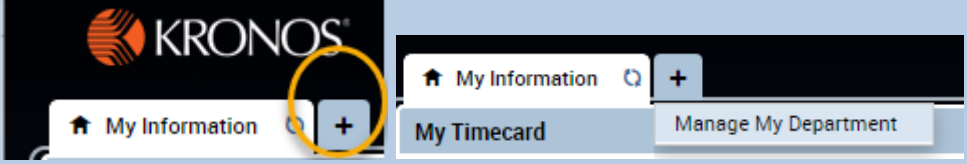

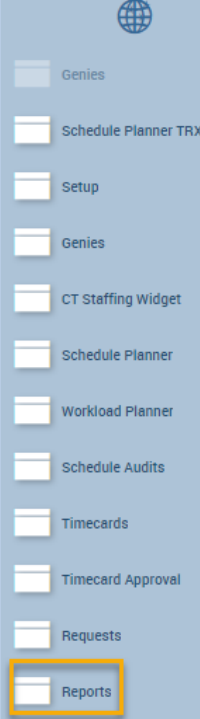

In the system, reports might be listed in one or more different categories. Each report lists the categories in which it appears in the system. The standard output format is Adobe Acrobat Portable Document Format (.PDF). Alternate formats for emailing include HTML, Microsoft Excel, Microsoft Word, and Rich Text Format

Description The Location Schedule with Coverage report combines information from the Location Schedule and Coverage reports. It schedules and staffing coverage numbers for a location regardless of primary job. The coverage data comes from the VOT. However, if the selected location contains locations that do not have data, the report does not show the schedules at the scheduled shifts or pay codes first by location, then by zone or shift set, and then by primary job.
