

Department of Administrative Services Hazardous Materials Abatement Program

Marcum, LLP Report: Executive Summary

Produced by the Connecticut Department of Administrative Services

April 20, 2023

Marcum Scope of Work:

DAS retained Marcum, LLP in 2022 as a third-party reviewer of the State of Connecticut's Hazardous Materials Abatement Program (HazMat Program)ⁱ. Specifically, Marcum was tasked with reviewing two components of the program:

1. The HazMat Program's processes and procedures.
2. The use of the HazMat Fund by the HazMat Program from August 2017 to December 2022 to ensure that funds were only utilized for projects on State-owned property.

Summarized Findings:

1. Processes and Procedures

a.) Use of Form 1165

Marcum found DAS' processes, including instructions and use of Form 1165, contain information that appears to be "clear, well defined, and conducive to a repeatable and thorough methodology." Marcum found many instances where there was no recorded use of Hazardous Material Assistance Request Form (Form 1165), a form used by state agencies and others to initiate a project in the HazMat Program. However, in each instance when Form 1165 was not used, there was email correspondence validating that the work was requested to be performed.

DAS developed and used the Form 1165 both before the HazMat Program moved out of DAS's purview in November 2019, and again, when it returned to DAS in October 2021.

b.) Project Tracking

Marcum suggested moving away from or modifying the Excel-based tracking currently used in the HazMat Program.

DAS is finalizing a year-long implementation of a new electronic project management platform which will expand capacity, accuracy, and efficiency when managing the HazMat Program. Until that system is fully implemented, DAS has adopted Marcum's suggestions for improving its current manual tracking system.

2. Fund Utilization

Marcum's review showed that more than 99% of the payments from the fund were used appropriately for state-owned properties. Less than 1% of the fund - \$88,025.65 - was disbursed to the American School for the Deaf (ASD).

The ASD's main building, Gallaudet Hall, was built by the DAS. A state project number was assigned to the project and a state building number established for the building. Over the years, ASD has also required asbestos removal and other HazMat projects on its campus. ASD requested removal through the program, often including on the request the state building number assigned to the building by DAS when it was constructed. Each project initiation request used either a Form 1165 or the alternative process developed at the time, often including a state building number, and because of the state's involvement with ASD over the years, the work was approved.

In addition, the State of Connecticut has frequently treated ASD as a state entity. For example, C.G.S. section 4a-54 allows ASD to use state contracts for purchasing and C.G.S. section 5-175 designates ASD as a "state-aided institution," meaning that its employees are covered by the state retirement program. In addition, state bond dollars have been allocated over the years for capital projects at ASD, which were administered by DAS.

After discovering this issue in the Spring of 2022, DAS notified ASD that it would need a different funding source in order to conduct hazardous materials abatement projects going forward.

DAS is currently working with the Office of Policy and Management (OPM) to identify an appropriate funding source to reimburse the HazMat Program for the work conducted at ASD.

¹**Hazardous Materials Abatement Program (HazMat Program):** The program provides assistance to Connecticut State Agencies for the removal or encapsulation of asbestos and other hazardous materials in state-owned buildings utilizing general obligation bond funds (HazMat Fund) authorized by the legislature for such purposes.

Re: State of Connecticut (“State”) Hazardous Materials Abatement Program

Dear Commissioner Gilman:

Utilization of the Hazardous Materials Abatement Program (the “Program”) is limited to Connecticut State Agencies who require hazardous material inspection and abatement services at State-owned properties or facilities, or DAS Construction Services project managers who require hazardous material inspection and abatement services for a State building construction, renovation, or addition project. The main source of funding for this Program is the Hazardous Material program Fund (the “Fund”). The Department of Administrative Services (the “DAS”) retained Marcum LLP to assess the Program, including requesting Marcum to assess use of the Fund from August 2017 to December 2022 to ensure that it was only utilized for projects on State-owned property.

To facilitate Marcum’s analysis of the Program, DAS provided the current *Instructions for Participation in the Statewide Hazardous Materials Abatement Program* and the current *Form 1165 Hazardous Material Assistance Request*. Overall, we found these documents to be clear, well defined, and conducive to a repeatable and thorough methodology. DAS has communicated to Marcum that it is moving away from manual tracking and Marcum has been part of discussions with DAS around the rollout of an electronic program management software system as it relates to this process. However, if manual tracking systems continue to be a part of the process, we recommend adding certain parameters to that process that will continue to help ensure that work doesn’t proceed under the HazMat Program if the work is not for proper uses.

To assess use of the Fund and test if it was only utilized for projects on State-owned property, Marcum analyzed fifty-two transactions. The sample size was determined based on information provided by DAS for the timeline of Marcum’s testing and Government Auditing Standards for tests of compliance with populations of greater than 250. The total sample size covered approximately 10% of the transactions detailed on the disbursement ledger provided to Marcum.

Based on audit best practices, sample sizes should be increased when errors from the initial sample population are noted, and the nature of those errors warrant such. Marcum determined that an increase in sample was required related to invoices paid on behalf of the American School for the Deaf (“ASD”). Specifically, we noted that two invoices from the sample selection were paid out of the Fund on behalf of the ASD, a non-State owned property. Accordingly, we searched for all disbursements made on behalf of the ASD over the full testing period. In total, payments made on behalf of the ASD totaled \$88,025.65, or less than 1% of the total amount disbursed through the Fund from August 2017 through December 2022. We also noted one instance in which the building location and three instances in which the invoice amount per the vendor invoices were inconsistent with the DAS Trackers; these instances were considered document consistency differences and not indicative of the need to expand the sample size of the testing performed.

During the time periods the program was housed within the DAS Construction Services unit, projects were recorded in an Excel spreadsheet, referred to below and in the report as the “HazMat tracking spreadsheets.” These spreadsheets were utilized by Marcum to conduct its analysis. However, based on conversations with DAS management, DAS is not aware that such a spreadsheet exists for the period August 2019 to December 2020, when the Program was not housed within DAS Construction Services. In lieu of a tracking spreadsheet, DAS provided a cash disbursement ledger to Marcum in order to facilitate assessment of transactions that occurred during this time period. In order to verify the completeness of the information contained in this ledger, Marcum compared the total disbursements for the test period to the Core-CT report provided by the Office of the State Comptroller without exception. These documents are included in the Appendices to this report as follows:

- Appendix B – Tracking spreadsheet for September 2017 through August 2019;
- Appendix C – Tracking spreadsheet for January 2021 through May 2022; and
- Appendix D – Cash disbursements ledger for August 2019 through December 2020

Appendix B, C, and D collectively are referred to as “the DAS Trackers” throughout this report.

The following report describes in more detail our procedures, findings, and recommendations. Our services were performed in accordance with the Statements on Standards for Consulting Services issued by the AICPA.

We appreciate the opportunity to assist you in this matter.

Kind regards,

Jeffrey C. Solomon, CPA
Partner

HAZARDOUS MATERIALS ABATEMENT PROGRAM

MARCUM LLP REPORT

APRIL 20, 2023

The contents of this document were prepared solely for the use of the State of Connecticut – Department of Administrative Services in the normal course of discharging its duties. It is not to be used, relied upon or referred to by any other party for any purpose.

INTRODUCTION AND ENGAGEMENT OBJECTIVES

The Department of Administrative Services (the “DAS”) retained Marcum LLP to assess the Program, including requesting Marcum to assess use of the Fund from August 2017 to December 2022 to ensure that it was only utilized for projects on State-owned property. During the time periods the program was housed within the DAS Construction Services unit, projects were recorded in an Excel spreadsheet, referred to below and in the report as the “HazMat tracking spreadsheets.” These spreadsheets were utilized by Marcum to conduct its analysis. However, based on conversations with DAS management, DAS is not aware that such a spreadsheet exists for the period August 2019 to December 2020, when the Program was not housed within DAS Construction Services. In lieu of a tracking spreadsheet, DAS provided a cash disbursement ledger to Marcum in order to facilitate assessment of transactions that occurred during this time period. In order to verify the completeness of the information contained in this ledger, Marcum compared the total disbursements for the test period to the Core-CT report provided by the Office of the State Comptroller without exception. These documents are included in the Appendices to this report as follows:

- Appendix B – Tracking spreadsheet for September 2017 through August 2019;
- Appendix C – Tracking spreadsheet for January 2021 through May 2022; and
- Appendix D – Cash disbursements ledger for August 2019 through December 2020

Appendix B, C, and D collectively are referred to as “the DAS Trackers” throughout this report.

Our services were performed in accordance with the Statements on Standards for Consulting Services issued by the AICPA.

I. STANDARD LIMITATIONS AND DISCLAIMERS

For this engagement, our services entail neither the rendering of legal advice by Marcum, its partners or staff, nor the compilation, review, or audit of financial statements or internal controls, as those terms are defined by the AICPA. Because our services are limited in nature and scope, they cannot be relied upon to discover all documents and other information or provide all analyses that may be of importance in this matter.

We have not and shall not be deemed to assume any duties or obligations to any third party. This report is limited to the specific scope of work agreed to with the DAS, as specified in Section III, Engagement Approach. In preparing this report, Marcum used professional care and diligence and relied upon information provided by the DAS, the Connecticut General Statutes (“CGS”), and other sources for our analysis. No representation or warranty, express or implied, is made by Marcum as to the accuracy or completeness of the information relied upon.

The contents of this document were prepared solely for the use of the State of Connecticut – Department of Administrative Services in the normal course of discharging its duties. It is not to be used, relied upon or referred to by any other party for any purpose.

II. BACKGROUND

The Department of Administrative Services provides Hazardous Building Material Inspection and Abatement services for Connecticut State Agencies and State Building Construction Projects, including the identification, abatement, and disposal of certain materials. Eligibility is limited to Connecticut State Agencies who require hazardous material inspection and abatement services at State-owned properties or facilities, or DAS Construction Services project managers who require hazardous material inspection and abatement services for a State building construction, renovation, or addition project.¹

Hazardous Material Program Funding may be used for²:

- Studies or analyses to identify hazardous materials and how best to abate them;
- Abatement of hazardous materials by removal or encapsulation; and/or
- Limited demolition that removes hazardous materials as part of the abatement process.

From November 2017 through August 2019, the HazMat Program was managed within DAS Construction Services. In August 2019, the HazMat Program moved to the Office of Policy and Management (OPM) under the direction of Michael Sanders, who reported to Kosta Diamantis. The HazMat Program subsequently returned to DAS following Kosta Diamantis's resignation from state service in October 2021, and continued to be managed by Michael Sanders until his untimely death in December 2021, when the Program was returned to the DAS Construction Services unit.

III. ENGAGEMENT APPROACH

Marcum was engaged by the DAS to obtain, assess and analyze the existing DAS HazMat Program Trackers and to test a sample of projects that were funded through the Program. The first tracker (Appendix B) contains transactions from January 2021 through May 2022. The second tracker (Appendix C) contains transactions from September 2017 through August 2019. The third report (Appendix D) is a general ledger report documenting disbursements from the Fund for January 2017 through December 2022, and contains 547 disbursements, of which the scope of Marcum testing was isolated to the period from August 2019 through December 2020. The DAS Trackers contain, among other things, information to identify the project number, project name, building location, and related vendor invoice data, including invoice number, invoice paid date, and fee.

The contents of this document were prepared solely for the use of the State of Connecticut – Department of Administrative Services in the normal course of discharging its duties. It is not to be used, relied upon or referred to by any other party for any purpose.

III. ENGAGEMENT APPROACH (Continued)

From The DAS Trackers, we randomly selected 52 transactions for testing. The sample size was determined based on information provided by DAS for the timeline of Marcum's testing and Government Auditing Standards for tests of compliance with populations of greater than 250. The total sample size covered approximately 10% of the transactions detailed on the disbursement ledger provided to Marcum. See Appendix A for the summary of testing details and results.

For the projects selected, we requested the following data: a) purchase order or other supporting requisition documentation to confirm the work was requested by and approved by a State agency; b) DAS purchase order; c) vendor invoice detailing the services and goods provided, and requesting DAS payment; and d) support that the services provided were performed at a State-owned property or facility.

Our testing included the following steps (see testing in Appendix A for procedures performed and related results):

- a) Obtain the State Agency request for services (such as Form 1165);
- b) Obtain a DAS purchase order or other requisition form and validate that the P.O. or requisition was issued prior to the vendor invoice date;
- c) Obtain vendor invoice and related supporting information, as applicable (time and material breakdown, material receipts, subcontractor receipts);
- d) Validate invoice details against the DAS Trackers;
- e) Validate unit price costs of vendor invoices against State purchase orders or requisitions and the State contract;
- f) Validate the work performed was done at a State-owned property or facility;
- g) Obtain the latest version of the *Instructions for Participation in the Statewide Hazardous Materials Abatement Program* and *Form 1165 Hazardous Material Assistance Request*, analyze the documents, and provide recommendations based on best practices; and
- h) Document our findings and related recommendations.

IV. FINDINGS AND RECOMMENDATIONS

Based on the documents provided, the following are the findings and recommendations resulting from our work.

IV. FINDINGS AND RECOMMENDATIONS (Continued)

Findings and Recommendations

- 1. Payments were made from the Fund on behalf of State-owned properties in 50 of the 52 transactions tested.** Two invoices were paid out of the Fund for a project at a non-State-owned property (American School for the Deaf). In total, based on expanded testing, payments for the American School for the Deaf spanned eight invoices and totaled \$88,025.65, or less than 1% (.31%) of the total amount disbursed through the Fund from August 2017 through December 2022. We also noted one instance in which the building location and three instances in which the invoice amount per the vendor invoices were inconsistent with the DAS Trackers. See Appendix A for more detail.

Background Note (provided by the Office of the Commissioner, and not subject to further Marcum testing). The ASD's main building, Gallaudet Hall, was built by the DAS. A state project number was assigned to the project and a state building number established for the building. Over the years, ASD required asbestos removal and other HazMat projects on its campus. ASD requested removal through the program, often including on the request the state building number assigned to the building by DAS when it was constructed. DAS processed the request using the approval process prescribed at the time, and because the request often included a state building number along with the state's involvement with ASD over the years, the work was approved.

The State of Connecticut has frequently treated ASD as a state entity. For example, C.G.S. section 4a-54 allows ASD to use state contracts for purchasing and C.G.S. section 5-175 designates ASD as a "state-aided institution," meaning that its employees are covered by the state retirement program. In addition, state bond dollars have been allocated over the years for capital projects at ASD, which were administered by DAS.

After discovering this issue in the Spring of 2022, DAS notified ASD that it would need a different funding source in order to conduct hazardous materials abatement projects going forward.

DAS is currently working with the Office of Policy and Management (OPM) to identify an appropriate funding source to reimburse the HazMat Program for the work conducted at ASD.

2. **A Form 1165 was utilized in 9 of the 52 transactions tested, and email correspondence was utilized for the remaining transactions.** State agencies are required to use Form 1165, *Hazardous Material Assistance Request*, to initiate a project within the Program. We found that in 43 instances, there was no record of a Form 1165. In each instance, there was email correspondence validating that the work was requested to be performed.
3. **Ensure processes are in place to reconcile disbursements by vendors utilized and by project number.** Under DAS's current process, Blanket Purchase Orders between DAS and the vendors are utilized. Blanket Purchase Orders covered all 52 test selections made by Marcum. Use of Blanket Purchase Orders is a common industry practice that provides administrative efficiency on the front end of the procurement process when coupled with an authorization protocol such as the Form 1165. In addition, Marcum recommends that formal documented reconciliations of expenditures by vendor against blanket purchase orders and of expenditures by project against agency requisitions are prepared.
4. **Consider developing or utilizing an electronic system to house the details of the DAS Trackers.** Currently, the Excel based system is very manual in nature and prone to errors. The DAS Trackers should be set up to flow in a similar fashion as the process dictates - for instance lay out the parameters necessary to track project approval, procurement, invoice processing, and the final payment. If the DAS continues to utilize manual trackers and automated project management software is not utilized, we recommend the following:
 - a. The DAS Trackers contains a column for Building Number. However, many are noted as "Not Listed". As this is part of the initial review steps to ensure the building is State owned, the column should be properly completed and utilized as the first approval for moving forward with the project under the assumption of utilizing State funds. Further, from a review of project invoices, not all locations for the work being performed is evident.
 - b. The DAS Trackers contain a column for the Solicitation Number. While a majority of the Solicitation Numbers could be found on the related vendor invoices, the two-letter suffix included with the Solicitation Number on the DAS Trackers could not be found on any of the invoices. Consider adding footnotes to the DAS Trackers, including defining what the Solicitation Number Suffixes identify.
 - c. Consider working with your vendors to customize invoicing that contains sufficient detail to readily identify key information related to the work being worked on. For instance, while the DAS Trackers contains a column for the Project #, the DAS project # was not listed on a majority of the invoices we reviewed.

5. Both the *Instructions for Participation in the Statewide Hazardous Materials Abatement Program*, and the *Form 1165 Hazardous Material Assistance Request*, contain information that appears to be clear, well defined, and conducive to a **repeatable and thorough methodology**. However, if manual tracking systems continue to be a part of the HazMat Fund process, we recommend adding certain parameters to The DAS Trackers based on the Instructions document and Form 1165. These additional parameters on The DAS Trackers will help ensure that as a screen test, work doesn't proceed under the HazMat Program if the work is not for proper uses or for a non-government owned building.
 - a. The DAS Trackers should include the allowable uses of Abatement funds (consider drop down tab with defined options - studies or analyses / abatement / limited demolition).
 - b. The DAS Trackers should have a State Address column (consistent with finding #3 above) - the building location should be spelled out to ensure work is being done on a State-owned property.
 - c. The DAS Trackers should have a column for Form 1165 that should be checked when the completed Form is properly submitted.
 - d. The Trackers should list total costs requested and then have parameters that follow the Instructions depending on the costs entered (consider using interactive data cells - for instance, if environmental consultant services are requested and are greater than \$10,000, a box should pop up to document that a work plan was obtained from all eligible consultants).

April 20, 2023

Appendix A – Marcum Testing File

Marcum was engaged by the DAS to obtain, assess and analyze the existing DAS HazMat Program Trackers and to test a sample of projects that were funded through the Program. We randomly selected 52 transactions for testing. The sample size was determined based on information provided by DAS and Government Auditing Standards for tests of compliance with populations of greater than 250. The contents of this Appendix summarize the results of Marcum's testing and includes a Legend to provide context around the results attained. This worksheet was the basis for the findings and recommendations provided in the report above.

Testing Steps Performed

- {1}** Based on support provided by the DAS, was the work performed at a State-Owned location?
- {2}** Was Form 1165, *Hazardous Material Assistance Request*, completed for the work performed?
- {3}** Was a purchase order utilized by the DAS to engage the vendor to do the work?
- {4}** Were the unit price costs consistent with the State Contract?
- {5}** Was a purchase order issued prior to receipt of the invoice?
- {6}** Were invoices and related supporting documentation (time and material breakdown, material and/or subcontractor receipts) obtained?
- {7}** Does the invoice and related supporting documentation agree to the Trackers?

Legend

- X** Testing result achieved.
- X1** The transaction was covered by a Blanket Purchase Order between the State of Connecticut Department of Administrative Services and the suppliers engaged to provide services under the HazMat Contract. The Blanket P.O.s are updated, within the prescribed contract, as activity with the suppliers is incurred. Marcum recommends that, in addition to the purchase orders in place, formal documented reconciliations of expenditures by vendor against the blanket purchase orders and of expenditures by project against agency requisitions are prepared.

- A** Form 1165 not provided. DAS team noted that Form could not be located. In lieu of the Form 1165, we were able to view email correspondence noting that the work was requested and approved prior to work commencing.

- B** Invoices were paid out of the Fund for a project at a non-State-owned property (American School for the Deaf). In total, based on expanded testing detailed below, payments for the American School for the Deaf spanned eight invoices and totaled \$88,025.65, or less than 1% (.31%) of the total amount disbursed through the Fund from August 2017 through December 2022.

ASD Holt Dorm Boiler Pipe	\$1,196.90
ASD Holt Dormitory Tile Monitor	\$2,672.50
ASD Holt Stairwell	\$23,071.80
ASD Holt Stairwell	\$2,720.00 Tested above
ASD Cottage D and E Flooring Abatement Monitoring	\$14,093.50 Tested above
ASD Cottage E, Remove & Dispose of Asbestos Flooring	\$17,998.04
ASD Cottage B, Remove & Dispose of Boiler	\$8,978.00
ASD Cottage D, Remove & Dispose of Asbestos Flooring	\$17,294.91
Summary of amounts paid per DAS Database	\$88,025.65

- C** During our testing of Atlas invoices, we noted that all amounts shown on the Tracker received had the same fee noted for all invoices from this vendor. The invoices received showed differing rates that agreed to final amounts paid, but did not agree to the Tracker (inconsistent information between vendor invoice and Tracker).

- D** Per review of the vendor invoice, certain references on the invoice are to Suites 101 and 117, while other references on the invoice are to Suites 101 and 107. Tracker references Suites 101 and 117; there is no mention of Suite 107 on the Tracker. Documentation inconsistency noted.

- E** Per review of the vendor invoice, it was noted that the work done for multiple locations. Each location was traced and agreed to a State owned property without exception.
