

COVID-19 Vaccine Biweekly Update – Monday, Feb 1

Doses administered – Preliminary Data

	Doses administered in last 7 days			Total cumulative doses		
	First doses	Second doses	Total doses	First doses	Second doses	Total doses
Hospital, Clinics & Local Health	63,868	30,332	94,200	276,566	60,526	337,092
Long-term care facilities	5,967**	10,953**	16,920**	62,293**	25,759**	88,052**
Total	69,835	41,285	111,120	338,859	86,285	425,144

** Data is preliminary and likely an undercount due to reporting lags

Total doses administered by age group

	Total Doses Administered			Percentage of age group received	
	First doses	Second doses	Total doses	First Doses	Second doses
0-24	12,697	3,691	16,388	1.2%	0.3%
25-34	37,109	14,386	51,495	8.3%	3.2%
35-44	37,733	14,534	52,267	8.8%	3.4%
45-54	44,496	16,734	61,230	9.3%	3.5%
55-64	50,670	18,681	69,351	9.9%	3.6%
65-74	32,487	8,835	41,322	9.2%	2.5%
75-84	82,400	4,016	86,416	44.3%	2.2%
85+	41,267	5,408	46,675	45.2%	5.9%
Total	338,859	86,285	425,144		

Doses shipped & delivered

	Shipments arriving this week (Feb 1 – Feb 7)			Cumulative arrived as of last week (Dec 14 – Jan 31)		
	First doses	Second doses	Total doses	First doses	Second doses	Total doses
Pfizer	27,300	16,575	43,875	219,375	104,325	323,700
Moderna	30,000	24,200	54,200	175,200	82,800	258,000
Total	57,300	40,775	98,075	394,575	187,125	581,700

Key messages & updates

- As of Sunday night, 425,144 doses of vaccine had been administered, including 338,859 first doses. Of the total doses administered, 337,092 doses have been

administered at hospitals, clinics, or local health departments and 88,052 doses have been administered to nursing home staff and residents.

- **45% of our 75 and over population have received their first vaccine dose**
- **More than 86,000 Connecticut residents are fully vaccinated**, having received both doses of the vaccination
- **Nearly all 2nd dose clinics at the state's nursing homes should be complete by the end of this week.**
- **Our priority and the priority of all of our vaccinators should remain focused on ensuring that our residents who are at highest risk from severe disease and death from COVID-19 are receiving the vaccine now.** All vaccinators should be scheduling and administering vaccine only to the 75+ population and Phase 1a individuals until further notice.
- **Our other priority is to ensure that 75+ residents from communities of color, who have been disproportionately impacted by COVID-19, are vaccinated.** Starting this week, DPH will be redirecting some of the state's allocation to locations with large populations of Black and Latino residents in order to address equity issues.
- **Anyone who has received a first dose of the vaccine should schedule and receive the second dose – this includes all individuals who were not eligible as either 75+ or Phase 1a but received the first dose.**
- **Updates have been made to the VAMS system to help providers schedule second shot appointments** at the time of the first shot appointment. Additionally, providers can now run reports in VAMS to conduct outreach to proactively schedule second doses for individuals who received their first shot but do not yet have a second appointment scheduled.
- **Until directed by the State or your employer, you are not currently permitted to schedule a vaccine appointment, even if you are eligible within Phase 1b.**
- **Patience remains the keyword:** With 1.3 million CT residents in Phase 1b and a limited supply of vaccine from the federal government, it will take time to vaccinate everyone eligible in this phase.
- **Continue to mask, social distance, practice good hand hygiene, and limit gatherings to the individuals in your own household.** With variants of COVID circulating in the US and the UK variant detected in CT, it is imperative that residents continue to follow these basic public health guidelines and to:
- **Get tested if you feel sick or have been exposed to someone who has tested positive for COVID-19 and self-quarantine if you are positive.**
