Criteria to Guide Model/Service Selection: Tiers 1 & 2 to start

Fit Definition: Does this EBP fit with the specific needs of families within Connecticut's candidacy population?

Feasibility Definition: How feasible will it be for Connecticut to implement and get reimbursed for this EBP?

Fit:

- Does this service match with the candidacy population?
- Is this service culturally responsive/is there evidence that this service has positive outcomes for communities of color?
- How accessible is this service to families? (e.g. in-home, community-based setting, etc.)

Feasibility:

- What tier of evidence is this service?
- Is this service established in Connecticut? How broadly?
- What are the educational, credentialing requirements or clinical expertise needed to deliver this service?

Sample Fit and Feasibility Matrix
