

## Connecticut: where precision meets productivity

From Sikorsky helicopters to Pratt & Whitney engines and Electric Boat submarines, Connecticut has long been a center of aerospace innovation. Today, more than 1,000 aerospace manufacturers and components suppliers make their home here—part of an industrial ecosystem of more than 4,400 manufacturing companies. Powering this diverse ecosystem is one of the nation’s most highly skilled and highly productive workforces with proven experience in aerospace manufacturing.

### A talent bank for leading-edge skills

Aerospace firms find that Connecticut offers a robust pipeline of experienced talent. Thanks to our concentration of aerospace companies, we have America’s seventh-highest concentration of aerospace engineers.<sup>1</sup> The state also ranks #4 for innovation<sup>2</sup> and #8 for scientists and engineers with doctorates per capita<sup>3</sup>.

## An environment ideal for innovators

From the growth of globalization to the demand for digital speed and precision, Connecticut is at the epicenter of advancements in aerospace.

In addition to our science and engineering expertise, Connecticut ranks among the top 10 states ready for growth in the “New Economy.” This ranking—which evaluates knowledge jobs, globalization, economic dynamism, the digital economy and capacity for innovation—demonstrates that Connecticut offers aerospace manufacturers a supportive environment for innovation.
