

## EV Registration Factsheet

The Electric Vehicle Registration Factsheet (EV Factsheet) is a snapshot of the number of EVs actively registered in the state on each specified date and is the result of analysis performed by DEEP on Connecticut DMV registration data. The Factsheet **does not** represent sales data.

Revised: February 13, 2026

## Overview

The Connecticut Department of Energy and Environmental Protection (DEEP) develops this Electric Vehicle Registration Factsheet (EV Factsheet) at the end of every six-month period ending June 30<sup>th</sup> and December 31<sup>st</sup> based on registration data provided by the Connecticut Department of Motor Vehicles (DMV).

## Background

DEEP receives two biannual registration datasets covering the January 1st – June 30th and July 1st – December 31st reporting periods. The DMV registration data contains protected personally identifiable information (PII) and is not made available to the public. DEEP ensures that no PII is contained in the EV Factsheet. View the [CT EV Registration Factsheet](#) on DEEP's [EV Data Analysis Tools](#) page.

DMV also posts an overview of these [electric vehicle registration datasets](#) identifying the number of EVs registered in Connecticut each year. The [EV registration dataset](#) is also published on the [CT Open Data Portal](#).

## EV Registration Analysis Overview - 2025 [July 1 – December 31]

In the second half of 2025, Connecticut surpassed a new milestone with over 70,000 electric vehicles (EV) registered. New registrations in 2025 added a net of 12,667 new EVs, representing a 20.94% growth year-over-year. In addition, Connecticut's EV market share reached over 3% for the first time in the second half of 2025. Year-over-year, Connecticut's EV market share rose from 2.69% in 2024 to 3.17% in 2025, indicating a strong year given the federal and state policy changes affecting rebates, incentives, and consumer purchasing conditions.
