Energy & Environmental Protection**  
Bureau of Air Management  
Engineering & Enforcement Division

## Air Permitting Contact Sheet

Obtaining a New Source Review (NSR) or Title V permit is only the first step in compliance with Air Regulations. Ongoing compliance must be demonstrated on a continuous basis as cited in your permit. It is important to familiarize yourself with the monitoring, reporting and record keeping sections of your permit, adhere to the applicable timelines and be aware that they may vary from year to year.

This contact sheet is being provided to assist a Permittee in identifying the appropriate group or person within the Bureau of Air Management to contact for information concerning an issued permit or approval of registration.

**If you have any specific questions regarding your permit, please first contact the staff listed in the permit approval letter you received with your permit.**

If you have any general permitting related questions not covered in the table below please contact the Engineering Division at [DEEP.BAM.AirPermits@ct.gov](mailto:DEEP.BAM.AirPermits@ct.gov) or (860) 424-4152.
