

Governor's Council on Climate Change
March 9, 2020 Meeting
Hartford, CT

Public Comments from Zoom Chat

Kirsten Ek, MD: Hello, my name is Kirsten Ek - I attended the Equity Working group. I thought that was a great summary. I wanted add a question if possible? My concern is whether anticipated climate-related health impacts, and planning for ways to prevent and/or treat them, particularly for the more medically vulnerable patients, should have its own working group, or be threaded into the Equity group or elsewhere? Thank you, Kirsten Ek

Adelheid Koepfer: Just wanted to see if Mitigation WG is also working on school busses & buildings? Question to mitigation working group: is school transportation (electrification of school bus fleets) and energy efficiency for public school buildings part of this group? Electric busses and NetZeroEnergy schools would go a long way!, would be equitable, and address climate as well as immediately improve health and productivity for students and staff!

Kip Kolesinskas; Will there be a section that incorporates regional/adjacent state issues and potential for mitigation and adaptation strategies that we should, or are pursuing?
