In Executive Order 21-3, the Governor's Council on Climate Change (GC3) is charged with monitoring and reporting on the state's progress on the implementation of climate mitigation and adaptation strategies annually by December 31st. Public Act 25-125 amended C.G.S. Sec. 22a-200a, known as the Global Warming Solutions Act, to require DEEP to publish an inventory of greenhouse gas (GHG) emissions by January 1st of each year. At this meeting, DEEP will share the results of the GHG emissions inventory through the year 2024, the most recent year for which data is available. Following the presentation, there will be a discussion with GC3 members to share updates and feedback on the state's progress, with a focus on adaptation and resilience to the impacts of climate change. The meeting is open to the public and there will be an opportunity for attendees to provide public comments. This meeting is being held during Connecticut's third annual Sustainability & Resiliency Week hosted by Governor Lamont.
