The State Energy Program purpose is to promote the adoption of energy efficiency and renewable energy technologies in the marketplace. As such, we have focused our program on multiple sectors. Those sectors include: Building Code training and compliance; Building Operator Training; Clean Cities program support; large commercial and industrial energy efficiency opportunities; small business energy efficiency opportunities, residential audits and efficiency opportunities; State building energy improvements, and incentives to promote the following kinds of installations on commercial and residential facilities: solar thermal systems, solar photovoltaic systems, geothermal heat pump systems; and fuel cell installations (commercial only). Piggybacking with existing program efforts in the state was a priority. Deliverables will include energy savings and greenhouse gas reductions. Progress will be measured on numbers of units completed, square footage of units completed, energy savings, and greenhouse gas reductions.

Quarterly Activities/Project Description*				
installations: 191 representing 1,304 tons capacity (31 this quarter); Home Energy Solutions: Because we reallocated funds toward the end of the quarter, only one Home Energy Solutions audit took place. However, 12,621 Energy Star appliance rebates were made through the program; Solar photovoltaic: 10 projects are proceeding but none have yet been completed; Fuel Cell Program: Five projects have been approved, representing each for a 2,400 kilowatts; State Building Energy Improvement Program: four active projects, one of them is in closeout; Building Operator training: A level 1 course was completed this quarter (30 students), another level 1 course began this quarter to be completed in October 2011; Commercial Industrial Efficiency: projects were completed at four commercial buildings (ten buildings cumulative); Clean Cities Coalition Support: The 4 Clean Cities Coalitions continued to work together to promote alternative fueling for transportation. They held one stakeholder meeting in the quarter. With Clean Cities assistance, a municipality took delivery of two CNG dump trucks and a taxi cab company took delivery of 35 CNG cars; a baseline building code compliance survey was completed and data compiled. 18 training classes were
