

# MAKING CONNECTIONS: DEEP GRANT FUNDS FOR MULTI-FAMILY HOUSING

We need your help in identifying multi-family properties of at least four units whose residents may benefit from internet service improvements.

## THE DEPARTMENT OF ENERGY & ENVIRONMENTAL PROTECTION (DEEP)

We're committed to high-speed internet access, also known as broadband, needed for full participation in modern life. Connecticut's economic future depends on a reliable and resilient broadband network that can grow with our increasing demand for bandwidth.

## ConneCTed Communities Grant Program

### FUNDING AVAILABLE FOR BROADBAND BUILDOUT

The ConneCTed Communities Grant Program funds broadband infrastructure projects in underserved areas, including the construction of high-speed, reliable internet throughout communities that need it most. And there is still broadband improvement funding available to help multi-dwelling units (MDUs) such as apartment buildings and other mixed-use rental properties.

## Help Us Connect!

Our goal is to collaborate with MDU owners and operators to help ensure residents have access to high-speed broadband at an affordable price.

Help us identify MDUs in Distressed Municipalities that could benefit from these improvements by [filling out this survey](#).

Scan the QR code to fill out a survey.

To learn more, visit [DEEP's website](#) or reach out to [DEEP.Broadband@ct.gov](mailto:DEEP.Broadband@ct.gov) with any questions.
